Note:

* Due to the irregular market quoting for some fine wool categories, figures shown relating to micron categories below 18 micron are an estimate based on the AWEX Premium & Discounts Report & other available information.

* For any category, where there is insufficient quantity offered to enable AWEX to quote, a quote will be provided based on the best available information.

* 10 Year data is not available for some micron categories, which may result in blank spaces in the table above.

Definitions:

* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown in the table above, detail the period of time during the past 3 & 10 years that the market has traded either at or below its current price.

The higher the percentile, the stronger the market.

MARKET COMMENTARY

One Australian Dollar = 1.039654 US as of: 31/01/2013

NORTHERN REGION –Sale Week 31/12 (41,963 bales offered nationally)

Wednesdays market was mainly in the 17.5 to 21 micron range, with a handy offering of Best-style types at the finer end. Whilst prices were higher across the board, it was the finer microns which enjoyed the most support. 16.5 to 17 microns jumped 50 cents with odd better lots up to 70 cents dearer (on a relatively small selection). The 17.5 to 19 micron range were generally 40 cents higher on the back of a stylish offering, while the medium to broad range rose 30 cents. Merino skirtings were 20 to 30 cents dearer, particularly in the better selection of 17 to 18 microns, while the broader microns & higher Vm types were generally 10-20 cents dearer. After a slow start locks improved to close slightly ahead while crutchings firmed 10 cents. Steady support also had crossbred types 5 to 10 cents higher. 2.8% PI

Thursdays market firmed on the back of a small offering. When compared to Wednesday, the 17 to 18 micron range remained unchanged (on a type-for-type basis) however the selection was generally of a lesser style and the volume was limited. In the broader microns prices were firm with some pockets edging 5-10 cents higher, particularly for the few lots around 22 microns. Merino skirtings were up to 15 cents dearer, with best length & low vm lots most affected. Locks were 5-10 cents dearer, crutchings were also firm on limited numbers. The crossbred market was also up to 5 cents dearer, with finer microns most affected. 1.9% PI.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.
