Note:

\* Due to the irregular market quoting for some fine wool categories, figures shown relating to micron categories below 18 micron are an estimate based on the AWEX Premium & Discounts Report & other available information.

\* For any category, where there is insufficient quantity offered to enable AWEX to quote, a quote will be provided based on the best available information.

\* 10 Year data is not available for some micron categories, which may result in blank spaces in the table above.

#### Definitions:

\* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown in the table above, detail the period of time during the past 3 & 10 years that the market has traded either at or below its current price. The higher the percentile, the stronger the market.

### MARKET COMMENTARY

### **One Australian Dollar =** 1.027467 **US as of: 28/02/2013**

# NORTHERN REGION – Sale Week 35/12 (48,954 bales offered nationally)

<u>Tuesdays</u> market was strong for the finer microns, with increased premiums widening the gap between Spinner and Best styles. 17 microns and finer (+40nkt) closed 20-30 cents dearer, 18 microns rose 10 cents while a limited offering of 19 microns eased 5-10 cents. The stylish selection of fine skirtings gained 30-40 cents, with 18 micron and finer, best length <3% Vm, 40 cents dearer, while the 5% Vm lots gained 20-30 cents. The limited offering of 19 microns also gained ground, closing 10-20 cents dearer. A good colour, bulky offering of fine locks attracted good support, closing 10 cents dearer, while a small offering of 27 to 29 micron crossbred was also tending in sellers favour on a nominal basis. 3.2 Pl

<u>Wednesdays</u> market closed on a softer note. 16 microns and finer were generally 20 cents cheaper, while 16.5 to 18.5 microns lost 10 cents. A limited offering of 19 microns and broader were par to buyers favour. Merino skirtings, were a little irregular with 18 microns and finer unchanged while 19 microns closed slightly cheaper (with the 5-8% Vm lots 5-10 cents easier). Fine locks gained 5 cents, while stains rose 5-10 cents. Another small crossbred offering had 27 to 29 microns unchanged on a nominal basis. 3.4% PI.

<u>Thursdays</u> market, marked the last day of sales to be held in the Newcastle selling centre. Ultrafine microns closed with strong buyer support, while 17 to 18.5 microns eased around 10 cents with the better style and strength lots less affected. The medium to broader microns (>19 micron) all lost ground ending the day 20 cents cheaper. Skirtings were in line with the fleece, with fine microns (<5% Vm) retaining good support while >18 microns lost ground ending the day 20 cents cheaper. Support was maintained in the oddments through out the week and locks remained fully firm on the last day of sale, as did the small offering of 27-29 micron crossbred. 5.5% PI

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.
