AU BALES OFFERED			* 16.5 is the lowest Micron Price Guide (MPG) published by The Australian Wool Exchange (AWEX). Therefore MPG's below 16.5 micron are an estimate based on the best available information at the time of publication. Likewise, for any category where there is insufficient quantity offered to enable AWEX to quote, a quote will also be provided.																	
AU BALES SOLD			* Recording of 15 & 15.5 micron commenced in October 2017, and as a result some historic data is not yet available for those MPG's. Where historic data is not available an estimate based on '16 micron statistics' and incorporating the existing 15 & 15.5 micron data, will be provided as a guide.

MARKET COMMENTARY Source: AWEX

Despite many industry observers predicting a dearer market, due to currency movements, the market recorded another small loss this series. When the market opened, it was immediately apparent that the lower AUD was not going to have the expected impact on prices, instead, losses were generally recorded.

Across the country, movements in the MPG's generally ranged between plus 2 and minus 33 cents, with the EMI dropping by 3 cents for the day (with small rises in the crossbred sector preventing a larger fall).

The second day of selling was very similar to the first, with movements in the Merino fleece MPG's ranging between plus 2 and minus 21 cents, resulting in another 3-cent fall in the EMI.

Next week holds an unusual selling pattern, Sydney and Fremantle will sell on Tuesday and Wednesday, while Melbourne will sell on Wednesday and Thursday to accommodate a Public holiday on Tuesday.

Definitions:

* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown on the bottom line of table 2 & 3 (above) and in table 1 (on page 1), detail the amount of time during the past 3 & 10 years where the market has traded either at or below its current price.

* Deciles are a method of sorting ranked data into 10 equal groups. The data may be ranked from largest to smallest or vice versa.

The above Decile tables sort price Percentiles into 10 equal groups (in ascending order), with table 2 ranking the previous 3 years prices, while table 3 ranks prices over the previous 10 years

Example: In Table 2, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1619 for 60% of the time, over the past three years.

In Table 3, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1684 for 60% of the time, over the past ten years.

The above 'Rise or Fall' graph, shows how often the market has risen or fallen in a given month over the past 10 years, it does not show the extent of the movement only the frequency of direction. The 'Monthly Price Movement' graph shows the extent of movement for each month, for the past 5 years.

The above graph, shows how often the '12 month high & low' have been achieved for a

The above '**Rise or Fall**' graph, shows how often the market has risen or fallen in a given month over the past 10 years, it does not show the extent of the movement only the frequency of direction. The '**Monthly Price Movement**' graph shows the extent of movement for each month, for the past 5 years.

The above graph, shows how often the '12 month high & low' have been achieved for a given month over the past 10 years. It is not a measure of probability.

The above 'Rise or Fall' graph, shows how often the market has risen or fallen in a given month over the past 10 years, it does not show the extent of the movement only the frequency of direction. The 'Monthly Price Movement' graph shows the extent of movement for each month, for the past 5 years.

The above graph, shows how often the '12 month high & low' have been achieved for a given month over the past 10 years. It is not a measure of probability.

The above 'Rise or Fall' graph, shows how often the market has risen or fallen in a given month over the past 10 years, it does not show the extent of the movement only the frequency of direction. The 'Monthly Price Movement' graph shows the extent of movement for each month, for the past 5 years.

The above graph, shows how often the '12 month high & low' have been achieved for a given month over the past 10 years. It is not a measure of probability.

The above **'Rise or Fall'** graph, shows how often the market has risen or fallen in a given month over the past 10 years, it does not show the extent of the movement only the frequency of direction. The **'Monthly Price Movement'** graph shows the extent of movement for each month, for the past 5 years.

The above graph, shows how often the '12 month high & low' have been achieved for a given month over the past 10 years. It is not a measure of probability.

The above 'Rise or Fall' graph, shows how often the market has risen or fallen in a given month over the past 10 years, it does not show the extent of the movement only the frequency of direction. The 'Monthly Price Movement' graph shows the extent of movement for each month, for the past 5 years.

The above graph, shows how often the '12 month high & low' have been achieved for a given month over the past 10 years. It is not a measure of probability.

The above 'Rise or Fall' graph, shows how often the market has risen or fallen in a given month over the past 10 years, it does not show the extent of the movement only the frequency of direction. The 'Monthly Price Movement' graph shows the extent of movement for each month, for the past 5 years.

The above graph, shows how often the '12 month high & low' have been achieved for a given month over the past 10 years. It is not a measure of probability.

The above 'Rise or Fall' graph, shows how often the market has risen or fallen in a given month over the past 10 years, it does not show the extent of the movement only the frequency of direction. The 'Monthly Price Movement' graph shows the extent of movement for each month, for the past 5 years.

The above graph, shows how often the '12 month high & low' have been achieved for a given month over the past 10 years. It is not a measure of probability.

The above 'Rise or Fall' graph, shows how often the market has risen or fallen in a given month over the past 10 years, it does not show the extent of the movement only the frequency of direction. The 'Monthly Price Movement' graph shows the extent of movement for each month, for the past 5 years.

The above graph, shows how often the '12 month high & low' have been achieved for a given month over the past 10 years. It is not a measure of probability.

The above 'Rise or Fall' graph, shows how often the market has risen or fallen in a given month over the past 10 years, it does not show the extent of the movement only the frequency of direction. The 'Monthly Price Movement' graph shows the extent of movement for each month, for the past 5 years.

The above graph, shows how often the '12 month high & low' have been achieved for a given month over the past 10 years. It is not a measure of probability.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 9: Returns pr head for skirted fleece wool.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.
