AU BALES OFFERED			* 16.5 is the lowest Micron Price Guide (MPG) published by The Australian Wool Exchange (AWEX). Therefore MPG's below 16.5 micron are an estimate based on the best available information at the time of publication. Likewise, for any category where there is insufficient quantity offered to enable AWEX to quote, a quote will also be provided.																	
AU BALES SOLD																				
AU PASSED-IN%																				
AUD/USD			* Recording of 15 & 15.5 micron commenced in October 2017, and as a result some historic data is not yet available for those MPG's. Where historic data is not available an estimate based on '16 micron statistics' and incorporating the existing 15 & 15.5 micron data, will be provided as a guide.

**MARKET COMMENTARY** Source: AWI

Although the market recorded an overall loss for the third week in a row, the fall was minimal, and there were positive signs late in the series.

11.7% off the forecasted offering was withdrawn prior to the sale, reducing the national volume to 40,106 bales. Of this offering, 11.7% failed to reach seller reserve; consequently, only 35,417 bales changed hands. In the Eastern centres, the offer prices did not vary greatly from those of the previous series. The movements in the Individual MPGs in Sydney and Melbourne for merino fleece ranged within 20 cents of the previous week. While the crossbred, carding and skirtings sectors also recorded minimal change for the week. As a result, movement in the EMI was marginal, with the indicator reducing by 4 cents for the series to close at 1,210 cents.

Selling last, the Western region had a late upward surge; as a result, the Fremantle fleece MPGs added between 19 and 34 cents for the final day and between 26 and 44 cents for the week.

Noteworthy this week, the 1PP committee approved a line of wool from KINGSTON/TASMANIA. To be recognised as 1PP, strict criteria must be met, and the wool "must exhibit superlative quality, style and soundness and be prepared in the best possible manner". This was the first 1PP lot in the Southern region since August.

As this is traditionally a quiet shearing time in the West (as many farmers are well into their cropping programs), quantity dictates that no sale is needed in Fremantle next week. With only Sydney and Melbourne in operation, the national quantity has reduced, with 36,300 bales currently forecast for sale.

**Definitions:**

\* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown on the bottom line of table 2 & 3 (above) and in table 1 (on page 1), detail the amount of time during the past 3 & 10 years where the market has traded either at or below its current price.

\* Deciles are a method of sorting ranked data into 10 equal groups. The data may be ranked from largest to smallest or vice versa.

The above Decile tables sort price Percentiles into 10 equal groups (in ascending order), with table 2 ranking the previous 3 years prices, while table 3 ranks prices over the previous 10 years.

Example: In Table 2, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1656 for 60% of the time, over the past three years.

In Table 3, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1451 for 60% of the time, over the past ten years.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.
