Note:

* Due to the irregular market quoting for some fine wool categories, figures shown relating to micron categories below 18 micron are an estimate based on the AWEX Premium & Discounts Report & other available information.

* For any category, where there is insufficient quantity offered to enable AWEX to quote, a quote will be provided based on the best available information.

* 10 Year data is not available for some micron categories, which may result in blank spaces in the table above.

Definitions:

* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown in the table above, detail the period of time during the past 3 & 10 years that the market has traded either at or below its current price.

The higher the percentile, the stronger the market.

MARKET COMMENTARY

One Australian Dollar = 1.035796 US as of: 1/11/2012

NORTHERN REGION –Sale Week 18/12 (54,074 bales offered nationally)

Wednesdays market remained generally unchanged with only minor movements. The medium to fine micron categories closed in sellers favour while the broader end finished par to Just off the pace. Merino skirtings were solid across all descriptions with the finer end a little dearer. In the oddments, locks & stains were tending dearer while crutchings remained unchanged. The crossbred market also received good support and remained very firm, tending in sellers favour for 27 to 30 microns. 6.8% PI

Thursdays merino fleece market was mixed, with a slight lift at the finer end and a slight easing at the broader end. The better style and strength finer types gained ground, which countered the easing which occurred in the rest of the fleece market. Merino skirtings were generally unchanged with the burrier types attracting good competition, however there was some irregularity in the finer microns that contained <4% Vm. In the oddments, locks & stains gained further ground while a limited offering of crutchings remained unchanged. 2.9% PI

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.
