AU BALES OFFERED		48,389		* 16.5 is the lowest Micron Price Guide (MPG) published by The Australian Wool Exchange (AWEX). Therefore MPG's below 16.5 micron are an estimate based on the best available information at the time of publication. Likewise, for any category where there is insufficient quantity offered to enable AWEX to quote, a quote will also be provided. * Recording of 15 & 15.5 micron commenced in October 2017, and as a result some historic data is not yet available for those MPG's. Where historic data is not available an estimate based on '16 micron statistics' and incorporating the existing 15 & 15.5 micron data, will be provided as a guide.

MARKET COMMENTARY Source: AWI & AWEX

Buyers were met with another large sale this week, with just over 48,000 bales being offered. The recent surge in volume resulted in the largest February offering in eight years. Crossbreds contributed to the lift in volumes, increasing to 25% of the Jan/Feb total (up from 21% in the pre-Christmas period) but is in line with the trend from previous years.

The market handled the sizable offering effortlessly with the EMI firming 4 cents for the week. A weaker Australian dollar appeared to assist the overall result in local terms, with the EMI easing 9 cents when converted to US currency.

A staggered roster saw Melbourne and Fremantle open on a positive note on Tuesday with prices around 10 cents higher for Merino types. Wednesday saw all three centres in action and the market movements varied with each location. Sydney had odd pockets of strength thanks to a designated superfine sale but was otherwise cheaper. Melbourne was mostly dearer while Fremantle recorded only minor movements. The Eastern-only final day closed out the week with a five-cent gain in the EMI after good support was recorded in Sydney on the back of a stylish superfine selection.

Crossbreds closed 10 cents lower for most microns after losing ground on the final day. Merino Cardings firmed slightly while Merino Skirtings made only minor movements for the sale. The large sales continue into next week, with over 51,333 bales forecast in three centres, including another three-day Melbourne sale. In addition, a public holiday on Monday has resulted in Fremantle and Sydney holding auctions in a Wednesday/Thursday pattern.

Definitions:

* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown on the bottom line of table 2 & 3 (above) and in table 1 (on page 1), detail the amount of time during the past 3 & 10 years where the market has traded either at or below its current price.

* Deciles are a method of sorting ranked data into 10 equal groups. The data may be ranked from largest to smallest or vice versa.

The above Decile tables sort price Percentiles into 10 equal groups (in ascending order), with table 2 ranking the previous 3 years prices, while table 3 ranks prices over the previous 10 years.

Example: In Table 2, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1660 for 60% of the time, over the past three years.

In Table 3, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1431 for 60% of the time, over the past ten years.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 9: Returns pr head for skirted fleece wool.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 10: Returns pr head for skirted fleece wool.
