Note:

* Due to the irregular market quoting for some fine wool categories, figures shown relating to micron categories below 18 micron are an estimate based on the AWEX Premium & Discounts Report & other available information.

* For any category, where there is insufficient quantity offered to enable AWEX to quote, a quote will be provided based on the best available information.

* 10 Year data is not available for some micron categories, which may result in blank spaces in the table above.

Definitions:

* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown in the table above, detail the period of time during the past 3 & 10 years that the market has traded either at or below its current price.

The higher the percentile, the stronger the market.

MARKET COMMENTARY

One Australian Dollar = \$ 1.06 US, as of 2/06/2011

NORTHERN REGION –Sale Week 48/10 (36,860 bales offered nationally)

On Wednesday - The market was well supported leaving 19 to 21 microns par to 5 cents dearer, while a limited offering of 22 microns and broader were 15 cents dearer. Still thin on the ground, a slightly better offering in the finer end had 18 microns closing irregular and 17 microns remaining unchanged. Skirtings rose despite the limited selection of straight types, most descriptions from 3% to 8% Vm gained around 20 cents. Oddments also moved forward, with locks & crutchings improving by 5 to 10 cents, while stains remained firm.

On Thursday - The market maintained momentum and gained a further 15 to 20 cents with buyers paying higher premiums for FNF lots. 19.5 to 22 microns gained up to 20 cents while 19 microns were generally 10 cents dearer. A very limited offering in the fine end had the finer microns unchanged on a nominal basis. Skirtings remained fully firm with low Vm lots attracting strong interest. In the oddments, middle micron LKS closed in sellers favour, crutchings were firm while stains were irregular. There were only minor movements in the crossbreds with 27 to 30 microns closing in sellers favour.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.
