MARKET COMMENTARY

The slide in the wool market over the last few weeks appears now to be slowing, with the magnitude of the falls much less than the previous few sales. The final day of selling saw far less downside than did the first with the Southern market losing 18 cents on Wednesday and 8 cents on Thursday, whilst in the Northern region it was a 28 cent fall on Wednesday and 12 on Thursday.

Merino Fleece types are now settling into a level that many believe is more sustainable in the longer term, with the levels of a month ago being regarded as somewhat of a "false high" and could not be sustained at all. That said however, some of the lower grade types such as crutchings and stains have retreated quickly, and the heady prices of April & May would appear to be gone for the time being. Carding types lost as much as 40 cents in both regions on the final day this week, a market movement not seen in the cardings for a long time. Crossbred wool, which has enjoyed record levels for the best part of two seasons are now starting to settle back as well, although they remain at very good levels.

The sale rooms do not have quite the air of enthusiasm and optimism they had only a few weeks ago, although there is some quiet confidence from some sectors of a repeat performance of the last month later in the year, be it all of a lesser magnitude. As is always the way when the market begins to tighten, it is the better specified types which feel the effects last. Good style fleece with high tensile strength remained firm this week, and in some cases, even rose a little on Thursday, whilst higher vegetable content and low strength lines were discounted more heavily than in previous weeks.

With pass in rates now climbing and hovering around 10 percent this week, sellers would appear to be signalling that the current level is very near a level of "seller resistance", sentiment perhaps supported by the fact that many growers were accepting of this level when they sold forward in May.

Definitions:

* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown on the bottom line of table 2 & 3 (above) and in table 1 (on page 1), detail the amount of time during the past 3 & 10 years where the market has traded either at or below its current price.

* Deciles are a method of sorting ranked data into 10 equal groups. The data may be ranked from largest to smallest or vice versa.

The above Decile tables sort price Percentiles into 10 equal groups (in ascending order), with table 2 ranking the previous 3 years prices, while table 3 ranks prices over the previous 10 years:

Example: In Table 2, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1219 for 60% of the time, over the past three years.

In Table 3, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1194 for 60% of the time, over the past ten years.

Table 4: Riemann Forwards, latest trades as at: Last Date

Any highlighted in yellow are recent trades, trading since: Friday, 26 June 2015

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 8: Returns pr head for skirted fleece wool.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.
