AU BALES OFFERED		39,577	* 16.5 is the lowest Micron Price Guide (MPG) published by The Australian Wool Exchange (AWEX). Therefore MPG's below 16.5 micron are an estimate based on the best available information at the time of publication. Likewise, for any category where there is insufficient quantity offered to enable AWEX to quote, a quote will also be provided.																				
AU BALES SOLD		35,616	* Recording of 15 & 15.5 micron commenced in October 2017, and as a result some historic data is not yet available for those MPG's. Where historic data is not available an estimate based on '16 micron statistics' and incorporating the existing 15 & 15.5 micron data, will be provided as a guide.

## MARKET COMMENTARY Source: AWI

While little change was evident in this week's auctions, there was a strong and widespread bidding atmosphere, which helped consolidate the gains of the past few weeks. Overall, it was a very solid market.

Merino fleece pricing had superfine (<18mic) types selling 10 cents better, fine (18.5 to 20mic) types firm and medium (>20mic) wools upward of 15 cents stronger. Skirtings sold to the sellers favour, cardings remained firm and crossbreds sold 5 cents lower. The EMI gained 5 cents to finish at 1346. The WMI moved gained 4 cents to close at 1404. The continuation of the weaker forex rate of the AUD versus the USD helped overseas users once more. Despite the dearer local price, the USD EMI dropped 2 cents to 965.

China's first stage manufacturers kept their recent buying pressure on and strongly influenced the auction competition. This forced traders and indent buyers to up their ante as far as quantity obtained. New business opportunities to exporters was available, but was described as being very sporadic, limited in volume - mostly a negotiation from what both the overseas buyer wants and what the seller is prepared to commit to - and very price sensitive.

The ongoing issues with international logistics is a large contributor to market outcomes at present. The shipping situation is unpredictable at best. Vessels booked may arrive and sail or be delayed or not arrive at all. Container access and port delays are also playing a negative role. Combine those issues with the upcoming three week recess for Christmas and commercial decisions for local auction buyers become increasingly difficult and greater risk.

Next week has 41,000 bales being offered on Tuesday and Wednesday

## Definitions:

\* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown on the bottom line of table 2 & 3 (above) and in table 1 (on page 1), detail the amount of time during the past 3 & 10 years where the market has traded either at or below its current price.

\* Deciles are a method of sorting ranked data into 10 equal groups. The data may be ranked from largest to smallest or vice versa.

The above Decile tables sort price Percentiles into 10 equal groups (in ascending order), with table 2 ranking the previous 3 years prices, while table 3 ranks prices over the previous 10 years.

Example: In Table 2, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1738 for 60% of the time, over the past three years.

In Table 3, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1597 for 60% of the time, over the past ten years.

Table 4: Riemann Forwards, as at: 1/12/21

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 9: Returns pr head for skirted fleece wool.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.
