AU BALES OFFERED		28,999	* 16.5 is the lowest Micron Price Guide (MPG) published by The Australian Wool Exchange (AWEX). Therefore MPG's below 16.5 micron are an estimate based on the best available information at the time of publication. Likewise, for any category where there is insufficient quantity offered to enable AWEX to quote, a quote will also be provided.																	
AU BALES SOLD		21,549	* Recording of 15 & 15.5 micron commenced in October 2017, and as a result some historic data is not yet available for those MPG's. Where historic data is not available an estimate based on '16 micron statistics' and incorporating the existing 15 & 15.5 micron data, will be provided as a guide.

MARKET COMMENTARY Source: AWEX

This week saw Fremantle return to the roster after a week's break, pushing the national quantity to 28599. Individual MPGs in the Eastern centres lost between 34 and 85 cents on Tuesday, while Fremantle lost between 41 and 125 cents.

The NRI lost 42 cents on Tuesday and a further 21 cents on Wednesday. In total the NRI lost 63 cents to close the week at 919, a weekly fall of 6.4%. The NRI is now at its lowest point in 10 years. Due to a strengthening Australian dollar, when viewed in USD terms the losses were not as severe, with the NRI falling 30 USc to 676, a 4.2% reduction.

The crossbred sector also recorded heavy losses this series, 26 micron was the most affected with the Sydney and Melbourne MPGs falling by 119 to 154 cents. 32 micron lost another 30 cents, pushing it down to 190 (its lowest level since AWEX records began in 1995).

Next week the national offering reduces to 23,120 bales. Due to small quantities Sydney and Fremantle only require one-day sales, Sydney selling Tuesday and Fremantle selling Wednesday, Melbourne will be in operation over both days.

Definitions:

* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown on the bottom line of table 2 & 3 (above) and in table 1 (on page 1), detail the amount of time during the past 3 & 10 years where the market has traded either at or below its current price.

* Deciles are a method of sorting ranked data into 10 equal groups. The data may be ranked from largest to smallest or vice versa.

The above Decile tables sort price Percentiles into 10 equal groups (in ascending order), with table 2 ranking the previous 3 years prices, while table 3 ranks prices over the previous 10 years.

Example: In Table 2, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 2151 for 60% of the time, over the past three years.

In Table 3, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1574 for 60% of the time, over the past ten years.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 9: Returns pr head for skirted fleece wool.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 10: Returns pr head for skirted fleece wool.
