\* 16.5 is the lowest Micron Price Guide (MPG) published by The Australian Wool Exchange (AWEX). Therefore MPG's below 16.5 micron are an estimate based on the best available information at the time of publication. Likewise, for any category where there is insufficient quantity offered to enable AWEX to quote, a quote will also be provided.

\* Recording of 15 & 15.5 micron commenced in October 2017, and as a result some historic data is not yet available for those MPG's. Where historic data is not available an estimate based on '16 micron statistics' and incorporating the existing 15 & 15.5 micron data, will be provided as a guide.

**MARKET COMMENTARY** Source: AWEX

Adding to last week's gains, the market advanced further this week. Price levels were noticeably higher on day one, with widespread demand and spirited bidding maintaining the upward trajectory. By the end of the day, the EMI was 26 cents higher, supported by gains of 13-59 cents in the 'Eastern States' Merino Fleece MPG's. Late-selling Fremantle gained 36-60 cents, auguring well for day two, which saw the EMI gain another 11 cents, to close the week 37 cents higher at 1,890.

Next week's offering is forecast to reduce to 23,851 bales nationally. The limited supply is expected to attract continued support, as traders and early-stage processors look to secure stock ahead of the Nanjing Wool Market conference, which takes place in a fortnight (18-20 September).

| 10 Yr Percentile |      | 70%  | 79%  | 87%  | 90%  | 96%  | 95%  | 93%  | 90%  | 87%  | 84%  | 85%  | 83%  | 75%  | 76%  | 72%  | 83%  | 93% | 96% | 85%  |

**Definitions:**

\* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown on the bottom line of table 2 & 3 (above) and in table 1 (on page 1), detail the amount of time during the past 3 & 10 years where the market has traded either at or below its current price.

\* Deciles are a method of sorting ranked data into 10 equal groups. The data may be ranked from largest to smallest or vice versa.

The above Decile tables sort price Percentiles into 10 equal groups (in ascending order), with table 2 ranking the previous 3 years prices, while table 3 ranks prices over the previous 10 years

**Example:** In Table 2, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1537 for 60% of the time, over the past three years.

In Table 3, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1761 for 60% of the time, over the past ten years.

Table 4: Riemann Forwards, as at: **2/09/26** Any highlighted in yellow are recent trades, trading since: **Thursday, 27 August 2026**

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

**Table 10: Returns pr head for skirted fleece wool.**

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

**Table 15: Returns pr head for skirted fleece wool.**

| Skirted FLC Weight |             | Micron |      |      |      |      |      |      |      |      |      |      |      |      |      |      |      |      |      |
