AU BALES OFFERED	23,413		* 16.5 is the lowest Micron Price Guide (MPG) published by The Australian Wool Exchange (AWEX). Therefore MPG's below 16.5 micron are an estimate based on the best available information at the time of publication. Likewise, for any category where there is insufficient quantity offered to enable AWEX to quote, a quote will also be provided.																	
AU BALES SOLD	22,942		* Recording of 15 & 15.5 micron commenced in October 2017, and as a result some historic data is not yet available for those MPG's. Where historic data is not available an estimate based on '16 micron statistics' and incorporating the existing 15 & 15.5 micron data, will be provided as a guide.

**MARKET COMMENTARY** Source: AWEX

The Australian wool market strengthened again this week, with the benchmark AWEX Eastern Market Indicator (EMI) rising 30 cents across the two selling days. The EMI lifted 11 cents on Tuesday and a further 19 cents on Wednesday, extending the market's run of gains to five consecutive selling days. This follows the previous week's stronger result of 54 cents, resulting in an 84-cent rise in a fortnight.

Buyer demand remained solid despite a limited national offering of 23,414 bales, the smallest weekly roster in 12 months. Auctions were held only in Sydney and Melbourne, while auctions in Fremantle were paused due to the Western Australian public holiday. With fewer bales available, buyers competed strongly across most categories, and all Micron Price Guides recorded increases in both selling centres.

Merino fleece types were generally 20 to 30 cents dearer, although some pockets rose by as much as 50 cents. Well-prepared superfine lots continued to attract premiums, while Merino skirtings also posted gains in line with fleece types. Crossbred wools maintained their recent momentum, with 30-micron types among the standout performers, particularly in Melbourne. Merino cardings also continued their upward trend, with Melbourne's Carding Indicator now at its highest level in eight years.

Fremantle is scheduled to return next week, lifting the national offering to 26,178 bales. Despite higher overall volumes, the week is expected to be the second-smallest three-centre roster in the past six years.

**Definitions:**

\* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown on the bottom line of table 2 & 3 (above) and in table 1 (on page 1), detail the amount of time during the past 3 & 10 years where the market has traded either at or below its current price.

\* Deciles are a method of sorting ranked data into 10 equal groups. The data may be ranked from largest to smallest or vice versa.

The above Decile tables sort price Percentiles into 10 equal groups (in ascending order), with table 2 ranking the previous 3 years prices, while table 3 ranks prices over the previous 10 years

**Example:** In Table 2, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1511 for 60% of the time, over the past three years.

In Table 3, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1739 for 60% of the time, over the past ten years.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

**Table 9: Returns pr head for skirted fleece wool.**

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 12: Returns pr head for skirted fleece wool.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.
