#### Note

#### Definitions:

<sup>\*</sup> Due to the irregular market quoting for some fine wool categories, <u>figures shown relating to micron categories below 18 micron are an estimate based on the AWEX Premium & Discounts</u>
Report & other available information.

<sup>\*</sup> For any category, where there is insufficient quantity offered to enable AWEX to quote, a quote will be provided based on the best available information.

<sup>\* 10</sup> Year data is not available for some micron catedgories, which may result in blank spaces in the table above.

<sup>\*</sup> A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown in the table above, detail the period of time during the past 3 & 10 years that the market has traded either at or below its current price. The higher the percentile, the stronger the market.

#### JEMALONG WOOL BULLETIN (week ending 4/10/2012)

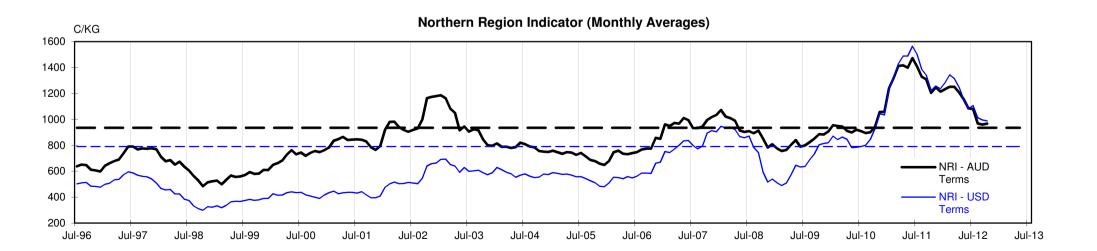

MARKET COMMENTARY

One Australian Dollar = 1.022327 US as of: 4/10/2012

NORTHERN REGION -Sale Week 14/12 (46,353 bales offered nationally)

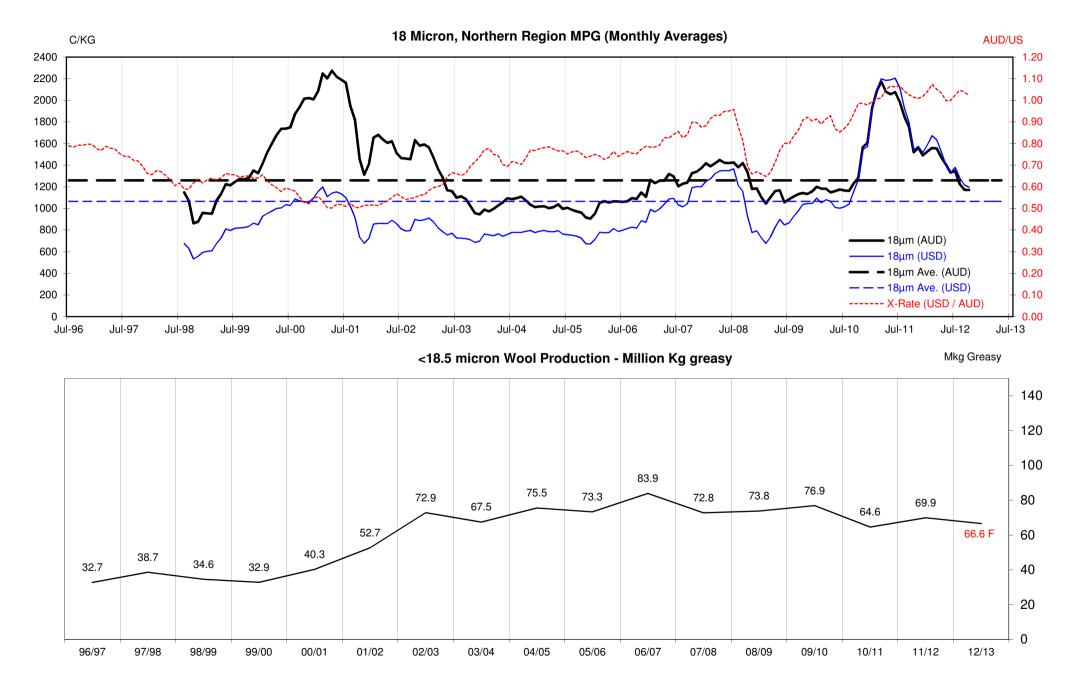

<u>Wednesdays</u> market was solid throughout the day, the lower styles did however struggle to maintain their previous levels while the better style and strength types attracted good support. The medium to broad 1% Vm range were all a little dearer with the focus on 21 microns lifting by as much as 10 cents. Merino skirtings were met with wide spread competition which had all descriptions 10 cents dearer, with buyer pressure concentrated on the 19 micron area which posted gains of around 20 cents. Locks improved as the sale progressed, finishing 10 cents dearer, while stains & crutchings remained fully firm. 26 to 28 micron crossbred remained fully firm (tending in sellers favour) while the broader end eased by 5-10 cents. 6.0% Passed-In.

<u>Thursdays</u> market received a lift with buyers pushing 19.5 microns and broader 20-25 cents higher, 18-19 microns also gained ground with rises in this area of around 10 cents. Once again wide spread competition had the merino skirting market very solid, with 5-10 cent rises for most descriptions. In the oddments, washing locks & fine carbo locks were very solid, while 19 micron and broader 5% Vm lots lifted by 5 cents. Stains and crutchings were generally unchanged on a small offering. 25 to 27 microns gained 10 cents, while the broader end remained firm, except 32 microns which on a limited offering rose 15 cents. 2.2% PI
