AU BALES OFFERED	37,212		* 16.5 is the lowest Micron Price Guide (MPG) published by The Australian Wool Exchange (AWEX). Therefore MPG's below 16.5 micron are an estimate based on the best available information at the time of publication. Likewise, for any category where there is insufficient quantity offered to enable AWEX to quote, a quote will also be provided.																	
AU BALES SOLD	36,442		* Recording of 15 & 15.5 micron commenced in October 2017, and as a result some historic data is not yet available for those MPG's. Where historic data is not available an estimate based on '16 micron statistics' and incorporating the existing 15 & 15.5 micron data, will be provided as a guide.

MARKET COMMENTARY Source: AWEX

The wool market surged ahead this week, recording a large overall rise for the series. After last week's larger-than-normal offering, volume dropped by 13,489 bales, leaving 37,212 bales available to the trade.

From the opening lot of the first selling day, it was immediately apparent that the market was on the rise. Strong, widespread competition pushed prices higher through to the final lot. In the merino fleece sector, individual MPGs rose by 21- 85 cents. As Sydney and Fremantle did not enjoy the rises on offer at the stand-alone Melbourne sale of the previous series, the largest rises were recorded in these centres, particularly for wool 18 micron and broader. The EMI closed the day 26 cents higher at 1,742.

On the second day, the market continued to rise, with MPGs adding another 22-56 cents across the country. The EMI gained a further 25 cents, taking the weekly rise to 51 cents, and closing the week at 1,767. Since this time last year, the EMI has gained 542 cents (44.2%).

Currency was a contributing factor this week; a fall in the value of the AUD against the US meant that when viewed in USD terms, the rise was not as significant. In contrast, the EMI gained a more modest 13 cents, closing at 1,237 US.

Next week's offering has risen above the original forecast, as the dearer market has encouraged more sellers to offer their wool. There is expected to be 45,973 bales on offer in Sydney, Melbourne and Fremantle.

Definitions:

- * A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.
Three and ten year percentiles shown on the bottom line of table 2 & 3 (above) and in table 1 (on page 1), detail the amount of time during the past 3 & 10 years where the market has traded either at or below its current price.
 - * Deciles are a method of sorting ranked data into 10 equal groups. The data may be ranked from largest to smallest or vice versa.
The above Decile tables sort price Percentiles into 10 equal groups (in ascending order), with table 2 ranking the previous 3 years prices, while table 3 ranks prices over the previous 10 years
- Example:** In Table 2, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1498 for 60% of the time, over the past three years.
In Table 3, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1719 for 60% of the time, over the past ten years.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 9: Returns pr head for skirted fleece wool.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 12: Returns pr head for skirted fleece wool.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.
