* Note: Due to the irregular market quoting for super fine wool, figures shown relating to micron categories below 18 mic, are an estimate based on the 42 nkt AWEX Premium & Discount Report & other available information. 10 year data is not available on some micron categories, which may result in blank spaces in the table above.

MARKET COMMENTARY

Australian Dollar

85.61 US as of 5/07/2007

NORTHERN REGION – Sydney Sale S01/07

On Tuesday – Over all the finer end (<18 microns) of the merino fleece market remained positive as the better style and strength types gained ground and the lower style top making types eased. 19 to 20 microns lost around 10 cents; 21 microns eased by 5, 22 microns remained firm while 23 microns rose 5 cents on a limited offering. Merino skirtings were generally unchanged for types with less than 5% Vm; higher Vm types were irregular through out the day. In the oddments, washing locks were irregular while carbo locks 19 microns and coarser remained unchanged as did crutchings. Crossbreds gained ground with 27 & 28 microns up to 10 cents higher while 29 to 32 microns were par to 5 cents dearer. 9,255 bales were offered with 6.6% Passed – In.

On Wednesday – Most microns in merino fleece retained there previous levels except the 17.5 micron and finer range which eased 10 cents (Lower style and Nkt types were most affected). 18 & 19 microns closed unchanged however 18.5 micron eased 5-10 cents. 20 to 21 microns were slightly dearer while 22 to 23 remained unchanged. Skirtings remained firm to sellers favour for all descriptions excluding high Vm types above 8% which dropped 10-20 cents. Oddments retreated across all sectors with locks down 15-20 cents and crutchings and stains falling by 20-25 cents. Crossbreds remained generally unchanged with 28 microns closing in sellers favour. 9,097 bales were offered with 13.2% Passed – In.

On Thursday – The merino fleece marked eased slightly. 17 microns and finer remained firm while 17.5 to 19.5 microns drifted some 5-10 cents lower (lower style & strength types were most affected). 20 to 21 microns closed unchanged, 22 to 23 microns were also unchanged for lower style and higher Vm lots, however a 20-30 cent premium was paid for low Vm (<1%) good style types which resulted in a 10-15 cent rise for these micron categories. Fine skirtings were irregular and ended the day 10-20 cents lower, all other descriptions below 8% Vm closed firm. Locks were 5-10 cents cheaper as were stains while crutchings were generally unchanged. Crossbreds were only slightly easier with 28-32 microns reducing by 5 cents. 6,796 bales were offered with 10.2% Passed – In.

A three week recess is now in progress, sales resume 31/7/07 with an estimated National offering of 72,000 bales expected for sale over three days in Sydney & Melbourne and two days in Fremantle.

A Decile rank is a rating, usually of performance, on a scale of 1 to 10 where 1 is best, 10 is worst, and each number corresponds to an increment of 10 percentage points.

A percentile is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general, a percentile less than 25 is considered below normal, a percentile between 25 and 75 is considered normal, a percentile greater than 75 is considered above normal.

Table 6 shows estimated returns per head on fleece wool, based on a skirted fleece weight of 9kg. These figures do not take into account the value of skirlings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 7: Returns for fleece wool pr head, based on skirted weight of: 8 kg

Table 8 shows estimated returns per head on fleece wool, based on a skirted fleece weight of 7kg. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 9: Returns for fleece wool pr head, based on skirted weight of: 6 kg

Table 10 shows estimated returns per head on fleece wool, based on a skirted fleece weight of 5kg. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 11: Returns for fleece wool pr head, based on skirted weight of: 4 kg

Table 12 shows estimated returns per head on fleece wool, based on a skirted fleece weight of 3kg. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 13: Returns for fleece wool pr head, based on skirted weight of: 2 kg
