AU BALES OFFERED		43,880	* 16.5 is the lowest Micron Price Guide (MPG) published by The Australian Wool Exchange (AWEX). Therefore MPG's below 16.5 micron are an estimate based on the best available information at the time of publication. Likewise, for any category where there is insufficient quantity offered to enable AWEX to quote, a quote will also be provided. * Recording of 15 & 15.5 micron commenced in October 2017, and as a result some historic data is not yet available for those MPG's. Where historic data is not available an estimate based on '16 micron statistics' and incorporating the existing 15 & 15.5 micron data, will be provided as a guide.

MARKET COMMENTARY Source: AWEX

The first sale of the new financial year is traditionally a larger sale, as sellers holding wool for tax purposes enter the market. Wool held over for the new selling season was significant, with wool older than 180 days representing just over a third of the national offering (and nearly 57% of the Western Region offering). This year in the opening sale 43,880 bales were offered to the trade.

The softer market tone that was evident in the previous sale, was apparent from the outset and corrections were felt across the entire merino spectrum, on all types and descriptions. As is often the case in a falling market, it was off-style types, wools with poor additional measurement results and those carrying excessive vegetable matter that were most affected. By the end of the week prices had generally fallen by 50-90 cents, with some off-style types over 120 cents cheaper. The NRI lost 62 cents for the series, closing at 2026 (the largest weekly fall since August 2012). Many sellers were reluctant to accept the reduction in prices, which was reflected in a national passed in rate of over 15%.

The skirtings also suffered large corrections, prices generally fell by 50-100 cents, lots carrying more than 5% VM were most affected. However, oddments attracted excellent support, with most types only 5-15 cents weaker.

Next week is the final sale before the annual three-week recess. Quantities have slightly reduced, currently there are 41,431 bales rostered.

Definitions:

* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown on the bottom line of table 2 & 3 (above) and in table 1 (on page 1), detail the amount of time during the past 3 & 10 years where the market has traded either at or below its current price.

* Deciles are a method of sorting ranked data into 10 equal groups. The data may be ranked from largest to smallest or vice versa.

The above Decile tables sort price Percentiles into 10 equal groups (in ascending order), with table 2 ranking the previous 3 years prices, while table 3 ranks prices over the previous 10 years.

Example: In Table 2, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1840 for 60% of the time, over the past three years.

In Table 3, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1399 for 60% of the time, over the past ten years.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 9: Returns pr head for skirted fleece wool.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 13: Returns pr head for skirted fleece wool.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.
