Note:

\* Due to the irregular market quoting for some fine wool categories, figures shown relating to micron categories below 18 micron are an estimate based on the AWEX Premium & Discounts Report & other available information.

\* For any category, where there is insufficient quantity offered to enable AWEX to quote, a quote will be provided based on the best available information.

\* 10 Year data is not available for some micron categories, which may result in blank spaces in the table above.

#### Definitions:

\* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown in the table above, detail the period of time during the past 3 & 10 years that the market has traded either at or below its current price. The higher the percentile, the stronger the market.

#### MARKET COMMENTARY

**One Australian Dollar =** 0.949090 **US as of:** 6/06/2013

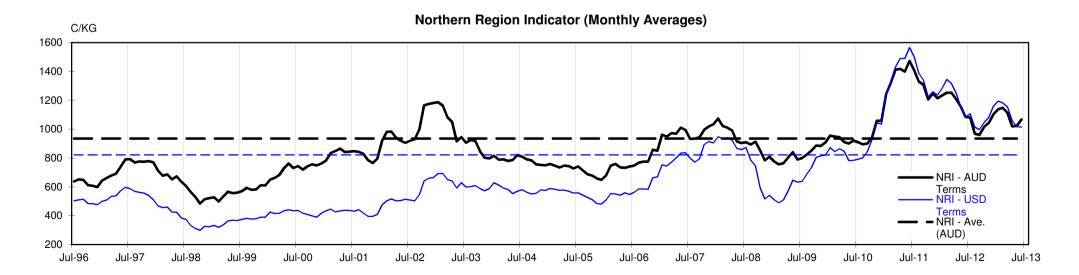

NORTHERN REGION – Sale Week 49/12 (25,045 bales offered nationally)

With no sales in the west and with only one day of sales in Sydney, the national offering was the smallest in almost 12 months with a meagre 25,000 bales rostered for sale.

On Wednesday merino fleece in both selling centres gained 10-20 cents, skirtings in the south were unchanged to 10 cents dearer, while those in the north were 10-30 cents dearer. The oddments market saw locks 10-15 cents dearer while Crossbreds were also firm to 15 cents dearer.

Melbourne was the only centre selling on Thursday; the market opened strong and continued to gain ground as the sale progressed. While the fine to medium microns closed 10-15 cents dearer, the broader microns attracted the most attention, with 21 to 23 microns 15-20 cents dearer (selected lots in this range traded at levels higher than 20 microns and in a rare event, the 22 MPG closed 4 cents higher than the 21 MPG).

There was also more interest on the forward market, with 18 contracts (90500 kg) trading for the week. Contracts were predominantly 21 micron spring contracts with prices generally 15-20 cents above those achieved the previous week.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.
