Note:

* Due to the irregular market quoting for some fine wool categories, figures shown relating to micron categories below 18 micron are an estimate based on the AWEX Premium & Discounts Report & other available information.

* For any category, where there is insufficient quantity offered to enable AWEX to quote, a quote will be provided based on the best available information.

* 10 Year data is not available for some micron categories, which may result in blank spaces in the table above.

Definitions:

* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown in the table above, detail the period of time during the past 3 & 10 years that the market has traded either at or below its current price.

The higher the percentile, the stronger the market.

MARKET COMMENTARY

One Australian Dollar = 1.022641 US as of: 5/09/2012

NORTHERN REGION –Sale Week 10/12 (39,804 bales offered nationally)

Tuesdays market gained support after a soft start, to finish the day on a positive note. Most microns closed fully firm to sellers favour. Strong buyer pressure had 19.5 microns 10-15 cents dearer, however coming off a very stylish Newcastle sale, 18 microns and finer lost ground. Merino skirtings were well supported to finish fully firm and unchanged for all descriptions. Locks remained unchanged, while crutchings & stains gained 10 cents. Most crossbreds gained a little ground with 27 to 29 microns 5-10 cents dearer while 30 microns were up to 20 cents dearer. 8.8% Passed-In.

Wednesdays market had a promising start, however drifted lower through out the day, leaving most microns 10-15 cents cheaper, despite continued interest for the better style and strength lots at the finer end. All merino skirtings enjoyed good competition to close fully firm and in sellers favour. Locks & crutchings were up to 10 cents higher and stains remained firm. Crossbreds bucked the trend and continued to edge up with 27 to 29 microns fully firm and 30 microns and broader 5 cents dearer. 8.9% PI

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.
