MARKET COMMENTARY

A smaller than expected offering and an easing in the AUD saw this week's market open on a solid note, leaving the NRI to close the week 8 cents dearer at 1341.

Wednesday's market saw most merino fleece types gain 5 cents with some strong buying pressure on the 18.5 and the 19.5 microns areas. Thursday's market was overall firm with the fine to medium microns slightly dearer, while the broader microns were just off the pace, with the higher mid break lots lacking some buyer support.

Merino skirtings gained 20-30 cents for the better style finer types with low Vm, while other types remained firm. Oddments were also well supported, with Locks & crutchings closing fully firm, while stains were 10-15 cents dearer.

This week's crossbred offering was firm and unchanged for 26 micron and broader on a limited offering.

Next week's market is currently forecast at 37,681 bales.

Definitions:

* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown on the bottom line of table 2 & 3 (above) and in table 1 (on page 1), detail the amount of time during the past 3 & 10 years where the market has traded either at or below its current price.

* Deciles are a method of sorting ranked data into 10 equal groups. The data may be ranked from largest to smallest or vice versa.

The above Decile tables sort price Percentiles into 10 equal groups (in ascending order), with table 2 ranking the previous 3 years prices, while table 3 ranks prices over the previous 10 years.

Example: In Table 2, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1384 for 60% of the time, over the past three years.

In Table 3, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1255 for 60% of the time, over the past ten years.

Table 4: Riemann Forwards, latest trades as at: Last Date

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.
