* Note: Due to the irregular market quoting for super fine wool, figures shown relating to micron categories below 18 mic, are an estimate based on the 42 nkt AWEX Premium & Discount Report & other available information. 10 year data is not available on some micron categories, which may result in blank spaces in the table above.

MARKET COMMENTARY

Australian Dollar

67.69 US as of 6/11/2008

NORTHERN REGION – Sale N19/08

On Tuesday - The market continued to deteriorate. Best and Good styles fell sharply with most of the finer microns 30-50 cents cheaper (compared to S18/08). Compared to the previous Newcastle sale held three weeks ago, spinners types were limited in number and fell in line with the falls recorded for topmaking styles over the same period. Medium microns attracted some-what better support with most types around 10 cents lower on limited quantity. Skirtings were up to 20 cents cheaper when compared to last week (on the back of an improved selection). Better locks & crutchings at the finer end were firm while others remained unchanged, while there were insufficient crossbreds on offer to quote. 4,234 bales were offered with 13.8% Passed In.

On Wednesday - The market firmed after the previous day's sharp falls. The more stylish types and some spinners, in the 16 to 18 micron range edged ahead by 20 cents, on the back of a more stylish selection. Medium to broad microns (19-22) were par to 10 cent dearer with the odd better type most affected. Best style skirtings ended the day 20 cents dearer, while lower styles/high Vm lots were unchanged. Locks also remained unchanged despite the 17 microns and finer becoming irregular towards the close due to a lack of bulk. Crutchings remained unchanged (once again on a limited offering) while stains closed 10 cents dearer. A very small crossbred offering left 28 microns unchanged. 3,669 bales were offered with 11.2% Passed-In.

On Thursday - The market was mixed, with super fine microns retreating and medium microns strengthening. 17 microns and finer spinners types lost 3% of their value, with the more stylish lots most affected. However solid buyer support moved 18.5 to 19.5 microns up 10 cents. Merino Skirtings finished in sellers favour with the most stylish types well supported, lower styles/higher Vm types remained firm. Locks eased by 10 cents for 17 microns and finer, which were the only locks on offer. Crutchings closed full firm on a limited selection. Crossbreds were insufficient to quote however the odd lot looked to ease back to Melbourne's levels. 3,701 bales were offered with 15.3% Passed-In.

Next weeks offering is estimated at 54,843 bales, an increase of 3.6% on the previous estimate of 52,940 bales.

A Decile rank is a rating, usually of performance, on a scale of 1 to 10 where 1 is best, 10 is worst, and each number corresponds to an increment of 10 percentage points.

A percentile is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general, a percentile less than 25 is considered below normal, a percentile between 25 and 75 is considered normal, a percentile greater than 75 is considered above normal.

Table 6 shows estimated returns per head on fleece wool, based on a skirted fleece weight of 9kg. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 7: Returns for fleece wool pr head, based on skirted weight of: 8 kg

Table 8 shows estimated returns per head on fleece wool, based on a skirted fleece weight of 7kg. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 9: Returns for fleece wool pr head, based on skirted weight of: 6 kg

Table 10 shows estimated returns per head on fleece wool, based on a skirted fleece weight of 5kg. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 11: Returns for fleece wool pr head, based on skirted weight of: 4 kg

Table 12 shows estimated returns per head on fleece wool, based on a skirted fleece weight of 3kg. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 13: Returns for fleece wool pr head, based on skirted weight of: 2 kg
