* Note: Due to the irregular market quoting for super fine wool, figures shown relating to micron categories below 18 mic, are an estimate based on the 42 nkt AWEX Premium & Discount Report & other available information. 10 year data is not available on some micron categories, which may result in blank spaces in the table above.

MARKET COMMENTARY

Australian Dollar

89.83 US as of 7/02/2008

NORTHERN REGION – Sydney Sale S32/07

On Wednesday – The market fell 20-30 cents bringing the northern region in line with the southern region. Lower style (low Nkt with high mid breaks) suffered the most, losing as much as 50 cents where as the better types (increasingly sound with low mid breaks) were 15-20 cents cheaper. The market did however firm towards the close of sale. Merino skirtings also fell 15-20 cents for most micron categories, with the poorer style and lower yielding lots up to 30 cents cheaper. Oddments drifted lower in line with the rest of the market. Washing locks were 10 cents easier and carbo types 15 cents cheaper. Crutchings lost 5-10 cents with the washing types most affected while stains were reduced by 20 cents. Crossbreds eased across the board with 26 to 28 microns 10-15 cents cheaper (however 27 microns were less affected), the 29 to 30 micron range eased by 5 cents. 8,144 bales were offered with a clearance rate of 83.1%.

On Thursday – After an early jump the market settled back to finish in positive territory. 20 microns and broader ended the day 5-10 cents dearer and 18 to 19.5 microns closed 15-20 cents higher, as buyers targeted the better strength lots. The fine end (Less than 17.5 microns), were the big performer with a rise in the order of 30 cents as Korean & Italian buyers paid premiums well above the Chinese level. Merino Skirtings retained their previous levels with the better style and length types well supported; lower style & shorter types were becoming irregular. Oddments were firm with locks, crutchings and stains remaining unchanged. Crossbreds also finished the day fully firm from 26-30 microns. 7,775 bales were offered with a clearance rate of 84.2%

Next weeks offering consists of 51,314 bales (an increase of 4.5% on the previous estimate of 49,100).

A Decile rank is a rating, usually of performance, on a scale of 1 to 10 where 1 is best, 10 is worst, and each number corresponds to an increment of 10 percentage points.

A percentile is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general, a percentile less than 25 is considered below normal, a percentile between 25 and 75 is considered normal, a percentile greater than 75 is considered above normal.

Table 6 shows estimated returns per head on fleece wool, based on a skirted fleece weight of 9kg. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 7: Returns for fleece wool pr head, based on skirted weight of: 8 kg

Table 8 shows estimated returns per head on fleece wool, based on a skirted fleece weight of 7kg. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 9: Returns for fleece wool pr head, based on skirted weight of: 6 kg

Table 10 shows estimated returns per head on fleece wool, based on a skirted fleece weight of 5kg. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 11: Returns for fleece wool pr head, based on skirted weight of: **4 kg**

Table 12 shows estimated returns per head on fleece wool, based on a skirted fleece weight of 3kg. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

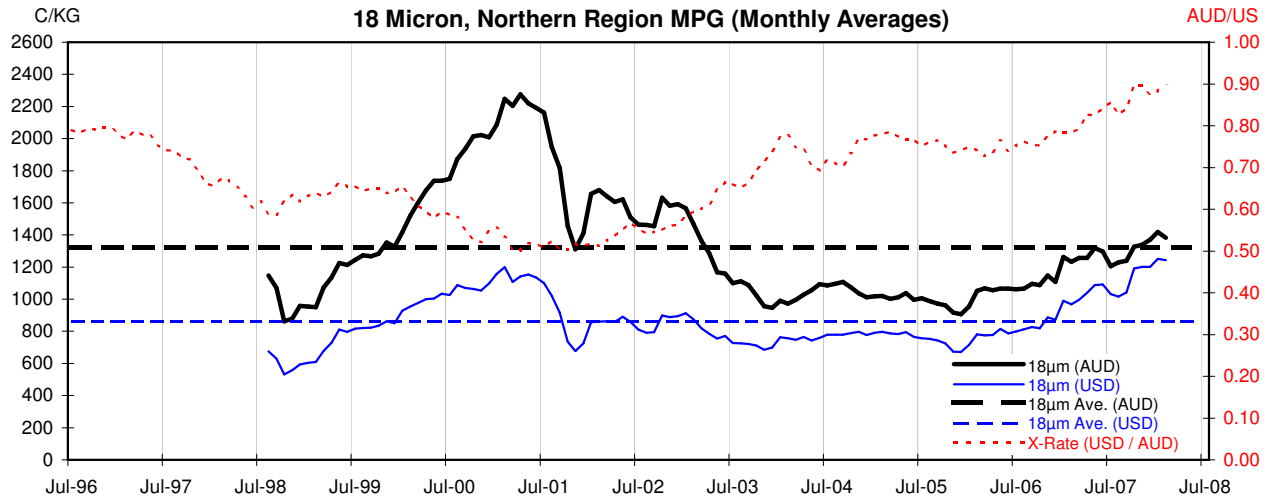

Table 13: Returns for fleece wool pr head, based on skirted weight of: 2 kg
