**Note:**

\* Due to the irregular market quoting for some fine wool categories, figures shown relating to micron categories below 18 micron are an estimate based on the AWEX Premium & Discounts Report & other available information.

\* For any category, where there is insufficient quantity offered to enable AWEX to quote, a quote will be provided based on the best available information.

\* 10 Year data is not available for some micron categories, which may result in blank spaces in the table above.

**Definitions:**

\* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown in the table above, detail the period of time during the past 3 & 10 years that the market has traded either at or below its current price.

The higher the percentile, the stronger the market.

MARKET COMMENTARY

One Australian Dollar = 1.031759 US as of: 7/02/2013

NORTHERN REGION –Sale Week 32/12 (53,614 bales offered nationally)

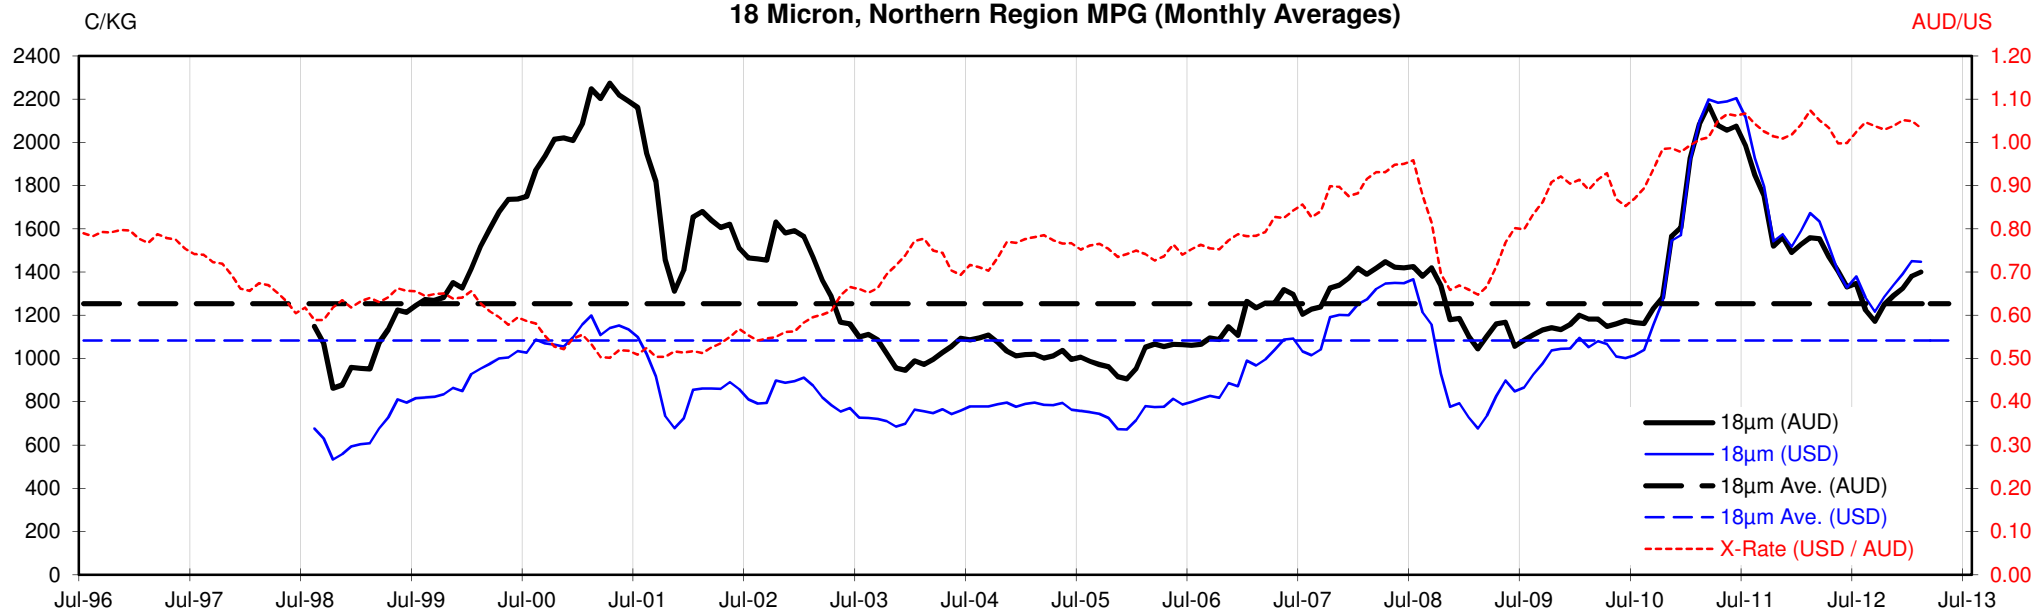

Wednesdays market tracked along a similar line to Tuesdays Melbourne sale, with a 5-15 cent easing for most types. Prices were initially up to 20 cents cheaper before improving as the day progressed and generally closing 5-10 cents cheaper. Selected lots at the finer end continued to find good support, as did the limited broader types which were only marginally cheaper in the last hour of selling. Best length low Vm fine skirtings (<17um) were very firm (tending dearer) while others were generally unchanged, with some of the higher Vm types irregular. Locks were 5 cents dearer and crutchings remained unchanged, while stains were 10 cents dearer. Crossbreds were generally unchanged, tending 5 cents cheaper, while XB Lambs rose 10 to 20 cents. 5.8% PI

Thursdays market saw the finer microns gain some ground on a stylish offering. 17.5 microns and finer rose by 10-20 cents, while 18 micron and broader remained mostly unchanged with selected lots improving slightly. Merino skirtings were unchanged while locks & crutchings gained 5 cents. Crossbreds were generally unchanged with the odd lots tending slightly cheaper. 3.8 % PI.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.
