NORTHERN REGION – Sale S45/08

Market Comment

Wednesday:

Merino Fleece: Closed generally unchanged with only minor movements across across the board as buyers took a wait and see approach in the first hour before stepping in. 18.5 and 22 microns were the only areas to show any weakness closing about 5 cents cheaper.

Merino Shirtings: All descriptions remained firm after a slow start, despite some of the pressure coming off the 19.5 micron lower VM types (<5%).

Oddments: Locks & Crutching's maintained good support and closed unchanged while stains eased slightly.

Crossbreds: Adjusted a little lower with 27 to 32 microns 3-5 cents easier.

Offering: 6,034 bales were offered in the North with 4.8% Passed In.

Thursday:

Merino Fleece: After Wednesdays strong finish buyers again pushed the market higher. The broader microns recorded a 25 cent rise while the medium range were 15 cents higher, fine microns lifted 5-10 cents.

Merino Shirtings: All descriptions gained 10 cents with buyers attracted to the better length and lower Vm lots, which posted distinct premiums.

Oddments: Solid support had all categories firm on the previous days close.

Crossbreds: Picked up 10-20 cents with the broader end 10-15 cents dearer while the finer crossbreds rose by 20.

Offering: 5,022 bales were offered in the North with 4.1% Passed In.

42,680 bales are rostered for next week's sale. Jemalong are selling on Wednesday, May 13.

7/05/09	Current MPG	1032	849	822	804	789	763	665	630	535	511

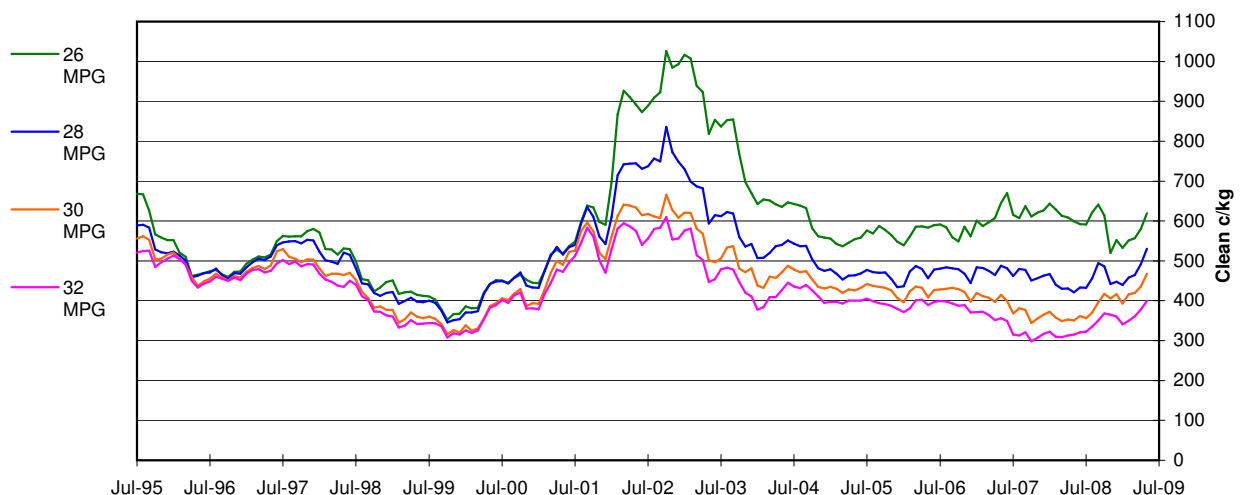

A Decile rank is a rating, usually of performance, on a scale of 1 to 10 where 1 is best, 10 is worst, and each number corresponds to an increment of 10 percentage points.

A percentile is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general, a percentile less than 25 is considered below normal, a percentile between 25 and 75 is considered normal, a percentile greater than 75 is considered above normal.

Table 6 shows estimated returns per head on fleece wool, based on a skirted fleece weight of 9kg. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 6: Returns for fleece wool pr head, based on skirted weight of: 8 kg

Table 8 shows estimated returns per head on fleece wool, based on a skirted fleece weight of 7kg. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 8: Returns for fleece wool pr head, based on skirted weight of: 6 kg

Table 10 shows estimated returns per head on fleece wool, based on a skirted fleece weight of 5kg. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 10: Returns for fleece wool pr head, based on skirted weight of: 4 kg

Table 13 shows estimated returns per head on fleece wool, based on a skirted fleece weight of 2kg. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

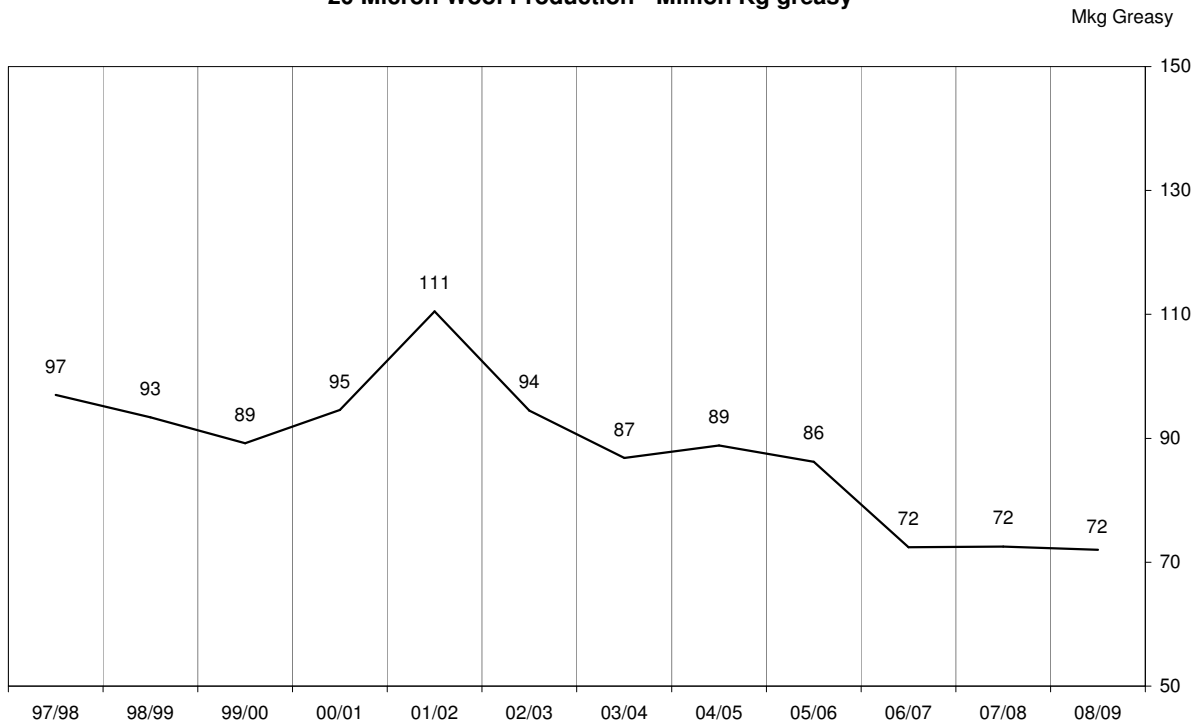

Fine Wool Production (Less than 19 microns)
Million Kg greasy
