AU BALES OFFERED	33,055		* 16.5 is the lowest Micron Price Guide (MPG) published by The Australian Wool Exchange (AWEX). Therefore MPG's below 16.5 micron are an estimate based on the best available information at the time of publication. Likewise, for any category where there is insufficient quantity offered to enable AWEX to quote, a quote will also be provided.																	
AU BALES SOLD	30,638		* Recording of 15 & 15.5 micron commenced in October 2017, and as a result some historic data is not yet available for those MPG's. Where historic data is not available an estimate based on '16 micron statistics' and incorporating the existing 15 & 15.5 micron data, will be provided as a guide.

MARKET COMMENTARY Source: AWEX

A strengthening Australian dollar (which hit 72 US for the first time since 2022), weighed heavily on the wool market this week, contributing to an 11-cent loss in the EMI. The benchmark indicator had been threatening to breach 1,900 cents but ultimately it closed the two-day series at 1,886.

Volumes continue to be constrained with only 33,055 bales offered nationally including a one-day Fremantle sale. On the opening day, all three centres were in operation. Main buyer attention continued to focus on the good/best style types, carrying less than 1.0% vm, particularly those with favorable additional measurement results. As these lots were in short supply, they performed best in what was an erratic market, with positive and negative movements across the merino fleece range. By the end of the day, the MPGs for merino fleece ranged between plus 30 and minus 29 cents. Stronger crossbred and oddment markets helped to minimise the loss in the EMI, which fell by the barest of margins.

On the second day, it was just Sydney and Melbourne selling and prices continued to deteriorate, with merino MPGs shedding upto 26 cents, resulting in a 10-cent fall in the EMI. In a repeat of the previous day, the strengthening crossbred & oddment sectors prevented the EMI from falling further.

Due to the strengthening of the AUD, when viewed in US dollar terms, the market movements were positive, with the EMI adding 6 US cents on the first day and 9 US cents for the second, closing the series 15 cents higher at 1,367.

Definitions:

* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown on the bottom line of table 2 & 3 (above) and in table 1 (on page 1), detail the amount of time during the past 3 & 10 years where the market has traded either at or below its current price.

* Deciles are a method of sorting ranked data into 10 equal groups. The data may be ranked from largest to smallest or vice versa.

The above Decile tables sort price Percentiles into 10 equal groups (in ascending order), with table 2 ranking the previous 3 years prices, while table 3 ranks prices over the previous 10 years

Example: In Table 2, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1499 for 60% of the time, over the past three years.

In Table 3, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1733 for 60% of the time, over the past ten years.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 9: Returns pr head for skirted fleece wool.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.
