Note:

* Due to the irregular market quoting for some fine wool categories, figures shown relating to micron categories below 18 micron are an estimate based on the AWEX Premium & Discounts Report & other available information.

* For any category, where there is insufficient quantity offered to enable AWEX to quote, a quote will be provided based on the best available information.

* 10 Year data is not available for some micron categories, which may result in blank spaces in the table above.

Definitions:

* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown in the table above, detail the period of time during the past 3 & 10 years that the market has traded either at or below its current price.

The higher the percentile, the stronger the market.

MARKET COMMENTARY

One Australian Dollar = 0.998572 cents US as of: 7/06/2012

NORTHERN REGION –Sale Week 49/11 (28,332 bales offered nationally)

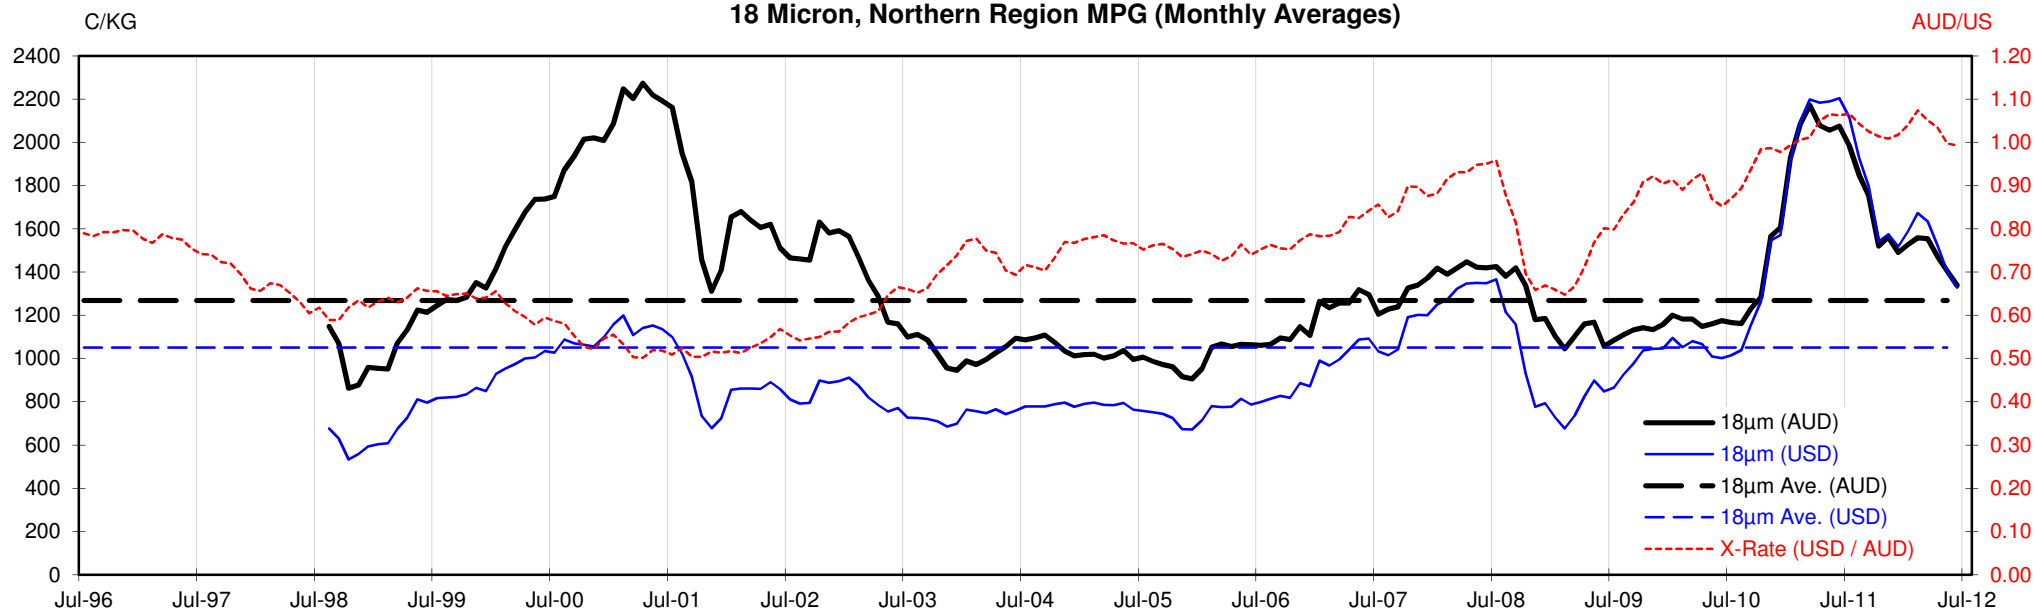

Wednesdays market saw a soft start, however sentiment improved with a strong focus on 21 microns with less than 1% Vm (which closed fully firm) while 18 to 20 microns eased 3 to 5 cents. The finer end continued to struggle on a limited offering where the lower style and strength lots lost 20-30 cents. Merino skirtings remained firm for the broader types, while the finer microns with 3-6% Vm fell 10-20 cents, closing the gap between the fine & broad. Locks were only just there (tending in buyers favour) while crutchings were 10 cents easier and stains remained unchanged. Crossbreds finished the day generally lower with 27 to 30 microns 10 cents cheaper. 12.0% PI

Thursdays market saw most microns from 18 to 22 with 1% Vm fall by around 10 cents, while the higher 2% Vm lots retreated 15-25 cents with 21 & 22 microns most affected. Merino skirtings were softer across the board with < 5% Vm types 10 cents cheaper, while higher Vm lots >6% fell 20 cents. Locks and crutchings closed unchanged while stains edged higher by 5 cents. Crossbreds remained fully firm to a little dearer with 27 to 29 microns unchanged, while 30 microns were 5-10 cents dearer. 9.1% PI

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.
