AU BALES OFFERED		48,860	* 16.5 is the lowest Micron Price Guide (MPG) published by The Australian Wool Exchange (AWEX). Therefore MPG's below 16.5 micron are an estimate based on the best available information at the time of publication. Likewise, for any category where there is insufficient quantity offered to enable AWEX to quote, a quote will also be provided.																			
AU BALES SOLD		41,607	* Recording of 15 & 15.5 micron commenced in October 2017, and as a result some historic data is not yet available for those MPG's. Where historic data is not available an estimate based on '16 micron statistics' and incorporating the existing 15 & 15.5 micron data, will be provided as a guide.

**MARKET COMMENTARY** Source: AWI

The first sale of the 2022/23 season was soft, resulting in a 26-cent reduction in the NRI, which closed the week at 1,483.

Despite attracting widespread competition, it was apparent from the opening lot that the prices offered were below those achieved in the previous series. Sydney and Melbourne suffered general falls of 10-60 cents in the merino fleece sector, while late selling Fremantle saw prices deteriorate further, with their MPGs generally shedding 40-80 cents for the week.

Merino skirtings followed a similar path to the fleece, while the oddments and crossbreds recorded minimal overall movements.

At 1,483, the NRI is 27 cents (1.7%) lower YOY. However, due to currency movement, it is 127 cents (11.2%) lower when viewed in USD terms.

Next week is the final sale before the mid-year recess. With many sellers taking the final opportunity to sell before the break, the national offering has increased considerably, with 61,054 bales now forecast for sale.

**Definitions:**

\* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown on the bottom line of table 2 & 3 (above) and in table 1 (on page 1), detail the amount of time during the past 3 & 10 years where the market has traded either at or below its current price.

\* Deciles are a method of sorting ranked data into 10 equal groups. The data may be ranked from largest to smallest or vice versa.

The above Decile tables sort price Percentiles into 10 equal groups (in ascending order), with table 2 ranking the previous 3 years prices, while table 3 ranks prices over the previous 10 years.

**Example:** In Table 2, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1691 for 60% of the time, over the past three years.

In Table 3, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1669 for 60% of the time, over the past ten years.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 9: Returns pr head for skirted fleece wool.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.
