AU BALES OFFERED		35,405	* 16.5 is the lowest Micron Price Guide (MPG) published by The Australian Wool Exchange (AWEX). Therefore MPG's below 16.5 micron are an estimate based on the best available information at the time of publication. Likewise, for any category where there is insufficient quantity offered to enable AWEX to quote, a quote will also be provided.																				
AU BALES SOLD		33,695																					
AU PASSED-IN%		4.8%	* Recording of 15 & 15.5 micron commenced in October 2017, and as a result some historic data is not yet available for those MPG's. Where historic data is not available an estimate based on '16 micron statistics' and incorporating the existing 15 & 15.5 micron data, will be provided as a guide.																				
AUD/USD		0.6543 0.0%

## MARKET COMMENTARY Source: AWEX

The market recorded rises on all three selling days in this series, albeit small ones. The national quantity continued to be relatively small for this time of year, with only 35,505 bales offered.

With Melbourne having a Public Holiday on Tuesday, it was just Sydney and Fremantle in operation. Fremantle gained 9-14 cents across all published MPGs, while Sydney posted mixed results; however, the rises were enough for a 3-cent rise in the Northern indicator.

All three centers were in operation on day two, and in general terms, the market continued to rise, with the EMI gaining 5 cents. MPG movements across the country ranged between -2 and +21 cents (with the finer microns in the North, being those that closed in the red).

The final day was a standalone Melbourne sale. Again, small MPG movements were recorded, lifting the EMI another cent, to close the week at 1132 (+7 for the week).

A similar size offering next week sees 36,573 currently forecast for sale.

**Definitions:**

\* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown on the bottom line of table 2 & 3 (above) and in table 1 (on page 1), detail the amount of time during the past 3 & 10 years where the market has traded either at or below its current price.

\* Deciles are a method of sorting ranked data into 10 equal groups. The data may be ranked from largest to smallest or vice versa.

The above Decile tables sort price Percentiles into 10 equal groups (in ascending order), with table 2 ranking the previous 3 years prices, while table 3 ranks prices over the previous 10 years

**Example:** In Table 2, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1614 for 60% of the time, over the past three years.

In Table 3, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1685 for 60% of the time, over the past ten years.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.
