AU BALES OFFERED		45,536	* 16.5 is the lowest Micron Price Guide (MPG) published by The Australian Wool Exchange (AWEX). Therefore MPG's below 16.5 micron are an estimate based on the best available information at the time of publication. Likewise, for any category where there is insufficient quantity offered to enable AWEX to quote, a quote will also be provided. * Recording of 15 & 15.5 micron commenced in October 2017, and as a result some historic data is not yet available for those MPG's. Where historic data is not available an estimate based on '16 micron statistics' and incorporating the existing 15 & 15.5 micron data, will be provided as a guide.

## MARKET COMMENTARY Source: AWEX

The Australian Wool Market has continued its roller coaster ride in Week 36. After the Benchmark Eastern Market Indicator (EMI) posted a new high in the previous sale, and many individual Micron Price Guides also posted new records, this week has seen the market suffer corrections. Nationally, there were 45,536 bales offered to the trade, a slight increase in quantity compared to Week 35.

Price reductions were felt from the outset and by the end of the sale, prices were generally reduced by 40 to 80 cents. It was the wools carrying impurities and those exhibiting poor length and strength results, that were the hardest hit, in many cases over 100 cents cheaper. Inversely, wools with very low mid breaks were highly sought after and sold at levels very similar to the previous sale.

The skirting market followed a similar trend to the fleece. Losses were felt right across the board, generally between 30 and 70 cents, wools with favourable length and strength results or those carrying less than 3.0% vegetable matter were least affected.

The crossbred sector defied the trend of the merinos and generally managed to record rises for the week. 25.0 to 28.0 micron posted solid gains of between 10 and 30 cents, the better prepared lines enjoying the largest price increases. 30.0 micron and coarser were par to 5 cents easier.

The oddment sector continued its downward trend. Locks, stains and crutchings experienced general reductions of 20 to 30 cents, which was reflected in the three carding indicators dropping by an average of 23 cents.

A limited selection of lambs was highly irregular but tending cheaper. Next week sees another slight increase in quantity. Currently, there is 43,894 bales on offer in Sydney, Melbourne and Fremantle.

**Definitions:**

\* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown on the bottom line of table 2 & 3 (above) and in table 1 (on page 1), detail the amount of time during the past 3 & 10 years where the market has traded either at or below its current price.

\* Deciles are a method of sorting ranked data into 10 equal groups. The data may be ranked from largest to smallest or vice versa.

The above Decile tables sort price Percentiles into 10 equal groups (in ascending order), with table 2 ranking the previous 3 years prices, while table 3 ranks prices over the previous 10 years.

**Example:** In Table 2, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1734 for 60% of the time, over the past three years.

In Table 3, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1358 for 60% of the time, over the past ten years.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 9: Returns pr head for skirted fleece wool.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 12: Returns pr head for skirted fleece wool.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.
