Note:

* Due to the irregular market quoting for some fine wool categories, figures shown relating to micron categories below 18 micron are an estimate based on the AWEX Premium & Discounts Report & other available information.

* For any category, where there is insufficient quantity offered to enable AWEX to quote, a quote will be provided based on the best available information.

* 10 Year data is not available for some micron categories, which may result in blank spaces in the table above.

Definitions:

* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown in the table above, detail the period of time during the past 3 & 10 years that the market has traded either at or below its current price.

The higher the percentile, the stronger the market.

MARKET COMMENTARY

One Australian Dollar = 1.040374 US as of: 8/11/2012

NORTHERN REGION –Sale Week 19/12 (48,358 bales offered nationally)

Wednesdays market opened soft and continued to ease as the sale progressed with 20 micron and finer generally 30-40 cents cheaper, while 20.5 and broader closed 20 cents cheaper with the higher Vm lots also contracting by 30-40 cents. Merino skirtings found support towards the end of the day, limiting the losses to 19 micron and broader, which lost 10 cents. In the oddments, fine locks lifted 5-10 cents while 19 microns and broader remained fully firm. Stains ended the day unchanged, while crutchings gained 10 cents. Crossbreds were only slightly easier, with 27 to 30 microns 5-10 cents cheaper. 13.3% PI

Thursdays market closed 25-35 cents lower for most micron categories, despite a late rally in the closing stages. The broader end was less affected as were the better style & strength types at the finer end. All merino skirtings closed 30 cents lower, with further losses for the burrier types. Oddments were however firm and generally unchanged with washing locks closing in sellers favour. The crossbred market also continued to ease, with 10-15 cent losses for 27 to 30 microns. 19.8% PI

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.
