Note:

* Due to the irregular market quoting for some fine wool categories, figures shown relating to micron categories below 18 micron are an estimate based on the AWEX Premium & Discounts Report & other available information.

* For any category, where there is insufficient quantity offered to enable AWEX to quote, a quote will be provided based on the best available information.

* 10 Year data is not available for some micron categories, which may result in blank spaces in the table above.

Definitions:

* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown in the table above, detail the period of time during the past 3 & 10 years that the market has traded either at or below its current price.

The higher the percentile, the stronger the market.

MARKET COMMENTARY

One Australian Dollar = 1.056205 US as of: 10/01/2013

NORTHERN REGION –Sale Week 28/12 (54,848 bales offered nationally)

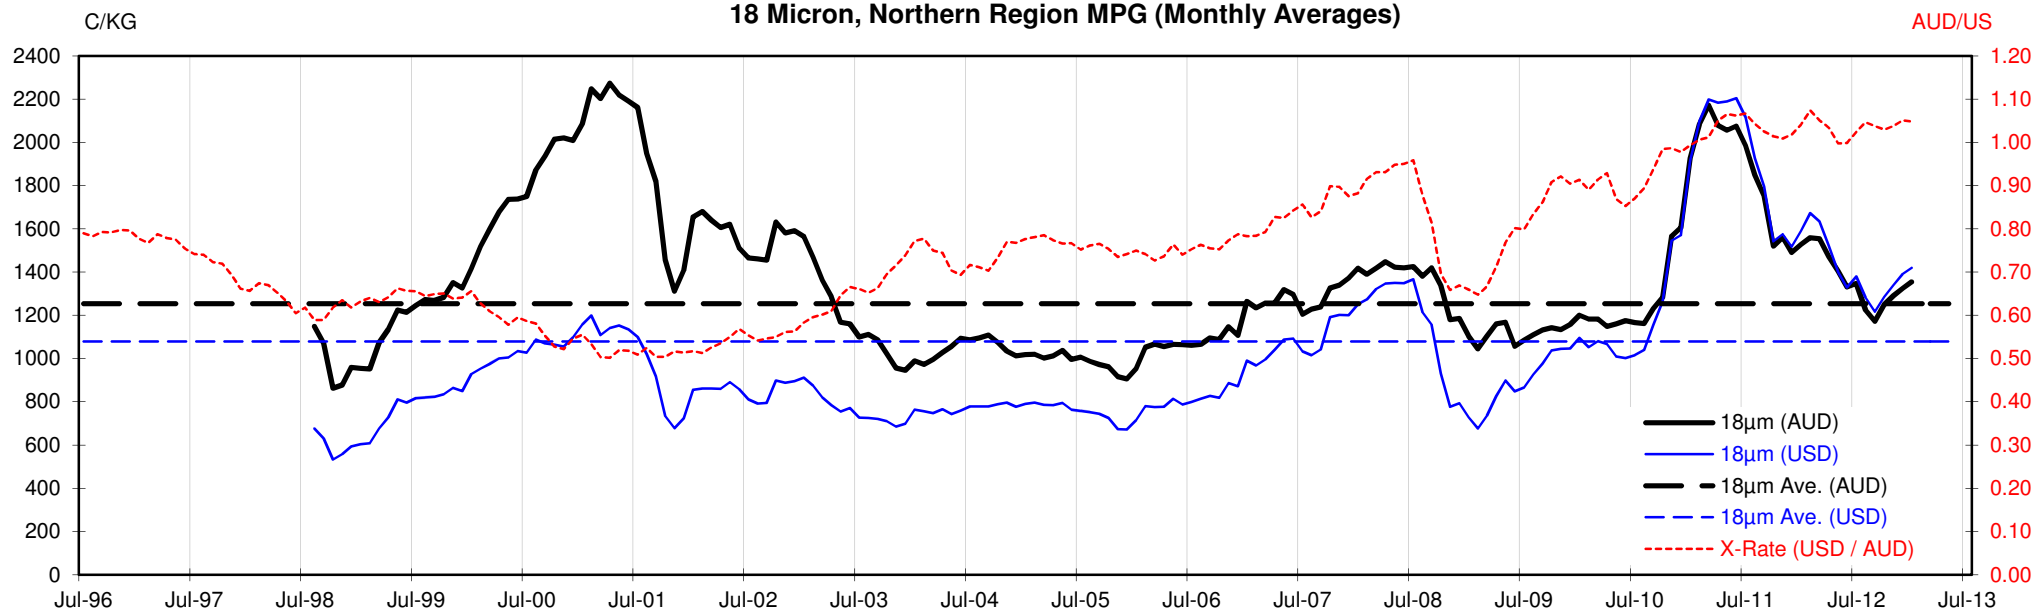

Wednesdays was a very positive start for the New Year, with all microns gaining 30-40 cents. Fine microns were generally 30 cents dearer and the medium to broader range 35-40 cents dearer (with the 2% Vm types as much as 40-50 cents dearer) when compared to pre Xmas levels. Rises in merino skirtings were depended on VMB, with 3% Vm generally 20 cents dearer, 5% Vm 30 cents dearer and 8-10% Vm 40-50 cents dearer. Locks were generally 30-35 cents dearer with carbo types most affected. Crutchings & stains also attracted good competition closing 20 cents dearer. Crossbreds while not as significant as the merinos, did gain ground with 26 to 29 microns up 15 cents on their previous levels and 30 microns and broader 10 cents dearer. 3.2% PI

Thursdays market (the 2nd smallest fleece offering this season) remained strong with medium to broad microns improving by 5-10 cents, while the finer end closed 15-20 cents higher. Widespread competition in the skirtings has produced further improvement with the focus on the lower Vm lots. 3% Vm and less have gained 30 cents while the burrier types were 10-20 cents dearer. Locks remained fully firm while stains & crutchings gained 10-15 cents. Good competition has 26-28 microns tending in sellers favour while 29 to 32 microns improved by 15 cents. 2.6% PI

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.
