| AU BALES OFFERED | | 49,029 | * 16.5 is the lowest Micron Price Guide (MPG) published by The Australian Wool Exchange (AWEX). Therefore MPG's below 16.5 micron are an estimate based on the best available information at the time of publication. Likewise, for any category where there is insufficient quantity offered to enable AWEX to quote, a quote will also be provided. | | | | | | | | | | | | | | | | | | |
| AU BALES SOLD | | 44,606 | * Recording of 15 & 15.5 micron commenced in October 2017, and as a result some historic data is not yet available for those MPG's. Where historic data is not available an estimate based on '16 micron statistics' and incorporating the existing 15 & 15.5 micron data, will be provided as a guide. | | | | | | | | | | | | | | | | | | |

MARKET COMMENTARY Source: AWEX

The market resumed after the annual mid-year recess, recording a small loss. The opening sale after the recess is traditionally one of the larger sales of the season, as it provides the first opportunity to sell at auction in three weeks (since early July). This year, there were only 43,697 bales offered, 11,666 less than the corresponding sale last season.

The market movements varied across different sectors, types and microns. Movements in the Merino fleece MPG's ranged from +42 cents (for 17 microns in the North) to -45 cents (for 19 microns in the West). The crossbred market was mainly positive, with the Southern Region 26 MPG gaining 37 cents. However, the 32 MPG in the same region suffered a 10-cent loss, preventing an across-the-board increase in the crossbred sector. The carding market also recorded an overall gain, ranging from unchanged to 24 cents dearer.

Sales will now continue every week until the end-of-year Christmas recess. 46,874 bales are expected to be offered next week, with sales being held in Sydney, Melbourne and Fremantle.

Definitions:

* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown on the bottom line of table 2 & 3 (above) and in table 1 (on page 1), detail the amount of time during the past 3 & 10 years where the market has traded either at or below its current price.

* Deciles are a method of sorting ranked data into 10 equal groups. The data may be ranked from largest to smallest or vice versa.

The above Decile tables sort price Percentiles into 10 equal groups (in ascending order), with table 2 ranking the previous 3 years prices, while table 3 ranks prices over the previous 10 years.

Example: In Table 2, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1659 for 60% of the time, over the past three years.

In Table 3, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1462 for 60% of the time, over the past ten years.

Table 4: Riemann Forwards, as at: 9/08/23 Any highlighted in yellow are recent trades, trading since: Thursday, 3 August 2023

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 11: Returns pr head for skirted fleece wool.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 15: Returns pr head for skirted fleece wool.

| Skirted FLC Weight 2 Kg | | Micron | | | | | | | | | | | | | | | | | |
