## JEMALONG WOOL BULLETIN (week ending 10/10/2013)

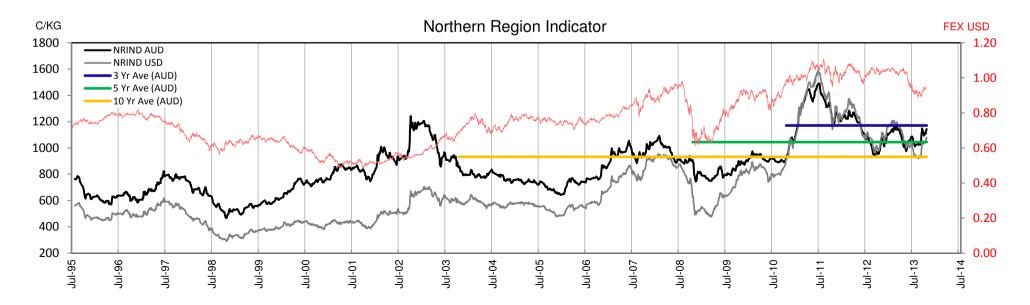

#### MARKET COMMENTARY

This weeks market saw 38,592 bales offered for sale nationally, again the offering was much reduced when compared to month earlier forcasts when the offering was expected to be closer to 47,000 bales.

The fine end of the market continued to struggle this week, with 16 micron/42 nkt fleece, losing 80 cents, to close at it's lowest level in over three years and while the medium to stronger end of the market gained ground, the price differential between 16 and 21 microns continued to narrow. There is now 267 cents between 16 and 21 microns, compared an average of 768 cents.

On a much more posative note the remainder of the market was very strong. In the merino fleece, 17 & 18 microns gained 20-30 cents, while the medium to broader end was 40 cents dearer. Finer crossbreds were about 20 cents dearer while the boader crossbreds were up to 10 cents dearer.

The forward market was also very strong this week with 168,200 kilos trading since last Thursdays close. While there were a couple of 19 & 22 contracts trade, the majority were 21 for October 2013 to September 2014 settlement. The highest price achieved was for February @ 1265.

**Decile Tables** are a useful tool for working out price targets.

<u>Percentiles</u> are a more accurate guide to where the market is currently trading (The higher the percentile, the stronger the market).

#### Definitions:

- \* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.
- Three and ten year percentiles shown on the bottom line of table 2 & 3 (above) and in table 1 (on page 1), detail the amount of time during the past 3 & 10 years where the market has traded either at or below its current price.
- \* Deciles are a method of sorting ranked data into 10 equal groups. The data may be ranked from largest to smallest or vice versa.

The above Decile tables sort price Percentiles into 10 equal groups (in ascending order), with table 2 ranking the previous 3 years prices, while table 3 ranks prices over the previous 10 year <a href="Example: Example: "Example: In Table 2"> Example: In Table 2</a>, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1413 for 60% of the time, over the past three years.

In Table 3, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1112 for 60% of the time, over the past ten years.

(week ending 10/10/2013)

The above 'Rise or Fall' graph, shows how often the market has risen or fallen in a given month over the past 10 years, it does not show the extent of the movement only the frequency of direction. The 'Monthly Price **Movement'** graph shows the extent of movement for each month, for the past 5 years.

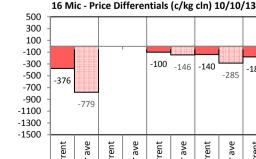

- 16 AUD

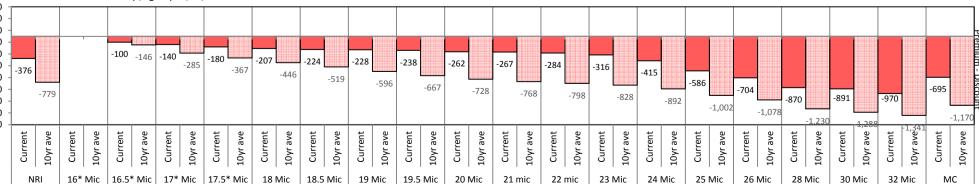

3500

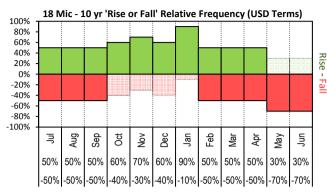

The above graph, shows how often the '12 month high & low' have been achieved for a given month over the past 10 years. It is not a measure of probability.

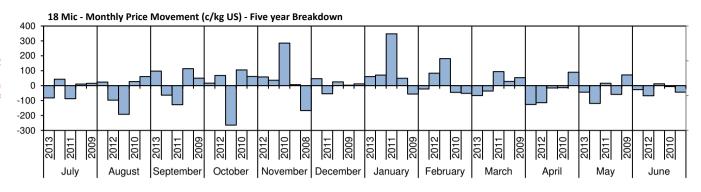

2500

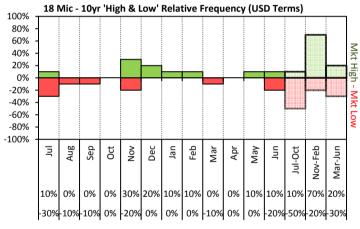

(week ending 10/10/2013)

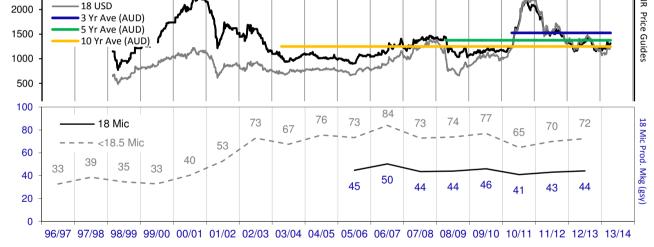

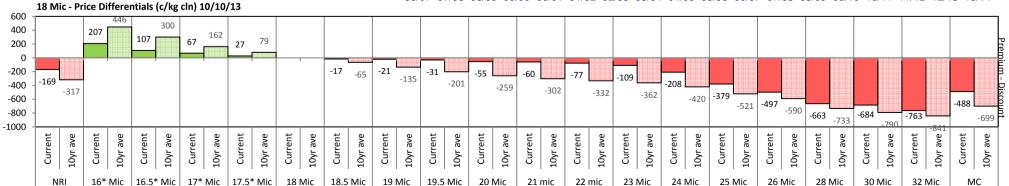

The above 'Rise or Fall' graph, shows how often the market has risen or fallen in a given month over the past 10 years, it does not show the extent of the movement only the frequency of direction. The 'Monthly Price Movement' graph shows the extent of movement for each month, for the past 5 years.

- 18 AUD

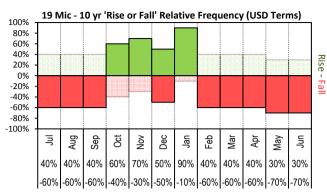

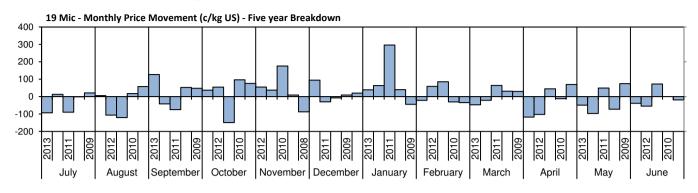

The above graph, shows how often the '12 month high & low' have been achieved for a given month over the past 10 years. It is not a measure of probability.

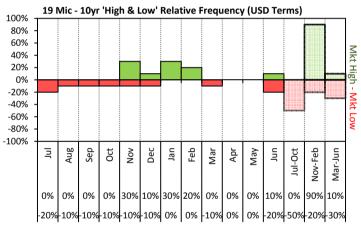

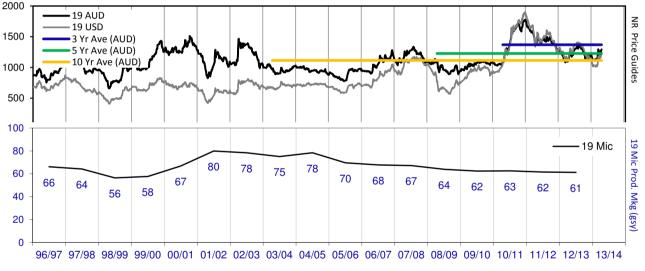

(week ending 10/10/2013)

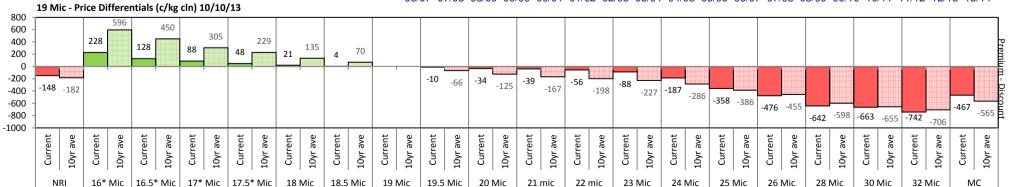

The above 'Rise or Fall' graph, shows how often the market has risen or fallen in a given month over the past 10 years, it does not show the extent of the movement only the frequency of direction. The 'Monthly Price Movement' graph shows the extent of movement for each month, for the past 5 years.

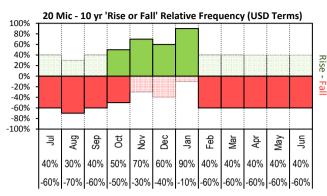

The above graph, shows how often the '12 month high & low' have been achieved for a given month over the past 10 years. It is not a measure of probability.
