AU BALES OFFERED	25,662		* 16.5 is the lowest Micron Price Guide (MPG) published by The Australian Wool Exchange (AWEX). Therefore MPG's below 16.5 micron are an estimate based on the best available information at the time of publication. Likewise, for any category where there is insufficient quantity offered to enable AWEX to quote, a quote will also be provided.																
AU BALES SOLD	24,823		* Recording of 15 & 15.5 micron commenced in October 2017, and as a result some historic data is not yet available for those MPG's. Where historic data is not available an estimate based on '16 micron statistics' and incorporating the existing 15 & 15.5 micron data, will be provided as a guide.

**MARKET COMMENTARY** Source: AWI

The wool market continued its climb this week, with the EMI gaining 15 cents to close at 1,979 ac/kg. After a scheduled non-sale week, the Western Market Indicator (WMI) returned to the market and posted a strong 45-cent rise to finish at 2,170 ac/kg. Currency movements also provided support, with the AUD weakening by 1.65 US cents over the selling week, improving purchasing power for offshore buyers. However, the lower exchange rate saw the benchmark indicators decline in US dollar terms, with the EMI falling 22 US cents to 1,385 usc/kg and the WMI easing 4 US cents to 1,519 usc/kg.

Fine Merino fleece types (16.5–19.0µm) generally added 20–25 cents, while medium Merinos (19.5–21.0µm) again outperformed, recording gains of 35–40 cents across the selling centres. Crossbred wools (25–32µm) continued their recent positive trend, rising 10–15 cents, and Merino cardings improved by 25–30 cents.

The EMI now sits at its highest point since October 2018 and just 21 cents below the 2,000 ac/kg threshold, a level that has become increasingly achievable as gains broaden beyond the fine Merino sector. Strength in medium Merinos, crossbreds and cardings suggests buyer confidence is being driven by wider market fundamentals rather than isolated demand for a single wool type.

This week's offering was the smallest three-centre roster since 2020, highlighting the tightening supply conditions currently supporting the market. With Fremantle absent from next week's selling program, national volumes will fall further, keeping supply pressure firmly in buyers' focus. Combined with another week of low passed-in rates and limited wool available outside the auction system, the supply backdrop remains supportive and should help sustain competition for well-specified lots in the short term.

Next week, Sydney and Melbourne will operate on Tuesday and Wednesday, with 21,720 bales currently rostered for sale.

**Definitions:**

- \* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.  
Three and ten year percentiles shown on the bottom line of table 2 & 3 (above) and in table 1 (on page 1), detail the amount of time during the past 3 & 10 years where the market has traded either at or below its current price.
  - \* Deciles are a method of sorting ranked data into 10 equal groups. The data may be ranked from largest to smallest or vice versa.  
The above Decile tables sort price Percentiles into 10 equal groups (in ascending order), with table 2 ranking the previous 3 years prices, while table 3 ranks prices over the previous 10 years
- Example:** In Table 2, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1512 for 60% of the time, over the past three years.  
In Table 3, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1742 for 60% of the time, over the past ten years.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 12: Returns pr head for skirted fleece wool.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.
