Note:

* Due to the irregular market quoting for some fine wool categories, figures shown relating to micron categories below 18 micron are an estimate based on the AWEX Premium & Discounts Report & other available information.

* For any category, where there is insufficient quantity offered to enable AWEX to quote, a quote will be provided based on the best available information.

* 10 Year data is not available for some micron categories, which may result in blank spaces in the table above.

Definitions:

* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown in the table above, detail the period of time during the past 3 & 10 years that the market has traded either at or below its current price.

The higher the percentile, the stronger the market.

MARKET COMMENTARY

One Australian Dollar = 0.928844 US as of: 11/07/2013

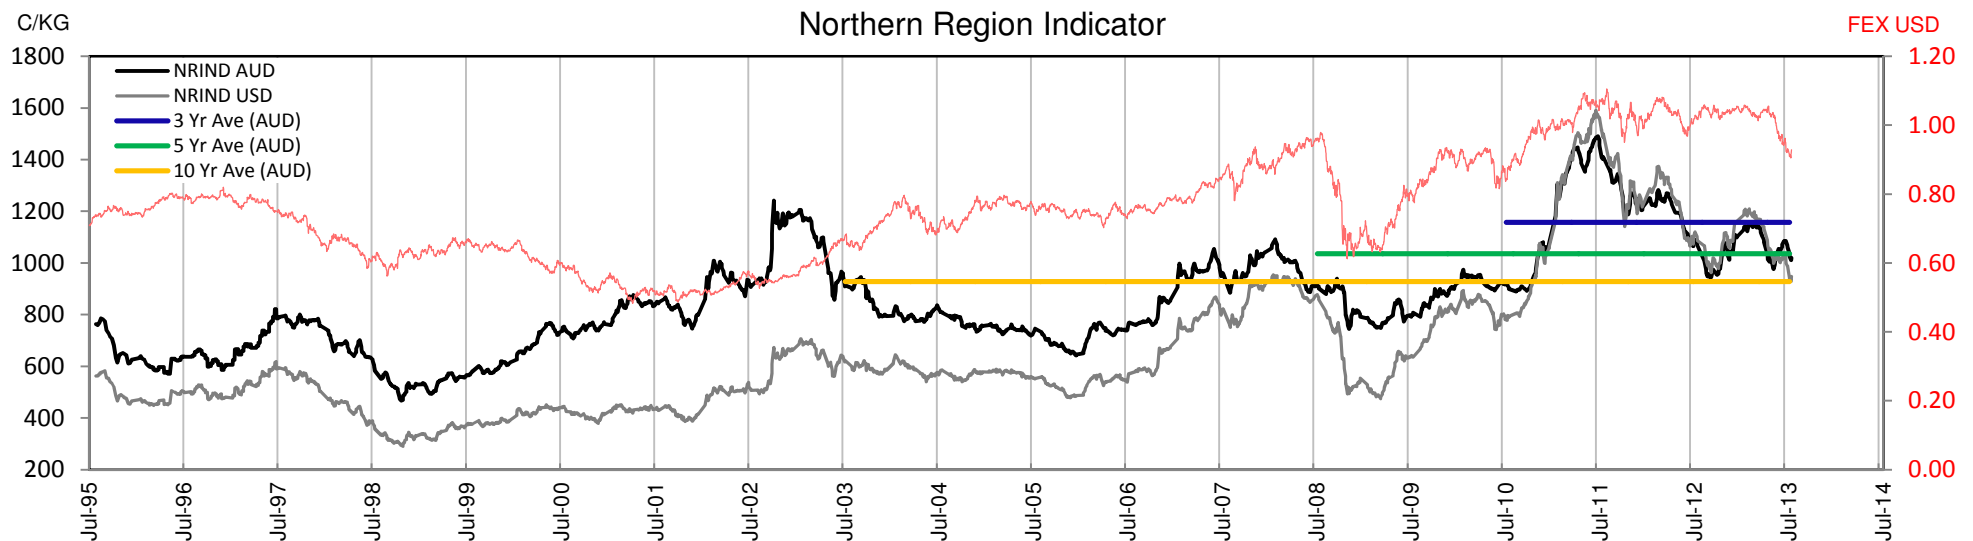

NORTHERN REGION –Sale Week 02/13 (51,261 bales offered nationally)

The market closes on a positive note leading into the annual three week recess.

After a disappointing opening in the South on Tuesday, the Northern Region market followed suit on Wednesday. Wednesdays market saw the finer micron fleece categories finishing slightly easier in the North, while the medium micron categories were reduced by 10, however it was the broader end of the spectrum that was most affected, recording losses of up to 20 cents. Merino skirtings also lacked support with 20-30 cent reductions, while oddments were firm to 5 cents cheaper. The Crossbreds market lost 10 cents in the 27 to 29 microns range, while the broader end remained unchanged.

Thursdays market improved across the board, with the finer micron merino fleece types 20-25 cents dearer, while the other micron categories were 10-15 cents dearer. Skirtings & oddments were well supported with all descriptions firm or tending dearer. Crossbreds regained 10 cents at the finer end, while the stronger microns continued to remain unchanged.

The next Auction sale is to be held week commencing 5th August, following an AuctionsPlus sale scheduled for the last week in July.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.
