| AU BALES OFFERED | | | * 16.5 is the lowest Micron Price Guide (MPG) published by The Australian Wool Exchange (AWEX). Therefore MPG's below 16.5 micron are an estimate based on the best available information at the time of publication. Likewise, for any category where there is insufficient quantity offered to enable AWEX to quote, a quote will also be provided. | | | | | | | | | | | | | | | | | |
| AU BALES SOLD | | | | | | | | | | | | | | | | | | | | |
| AU PASSED-IN% | | | | | | | | | | | | | | | | | | | | |
| AUD/USD | | | * Recording of 15 & 15.5 micron commenced in October 2017, and as a result some historic data is not yet available for those MPG's. Where historic data is not available an estimate based on '16 micron statistics' and incorporating the existing 15 & 15.5 micron data, will be provided as a guide. | | | | | | | | | | | | | | | | | |

MARKET COMMENTARY Source: AWEX

After tracking downward for the previous three weeks, the Australian wool market managed to bounce back into positive territory this week. The strongest demand was for a limited supply of wool 20 micron and coarser, pushing these types up by 20-95 cents, with the largest increases seen in Melbourne. The Northern Region Indicator (NRI) recorded an increase of 20 cents for the series, to close the week at 2,070.

A large national selection of fine tender wools struggled to attract sufficient demand. The better style wools sold at similar levels to the previous sale, however the losses felt for the tender and out of spec types, resulted in the MPG's for 17.5 micron and finer generally losing ground. Due to the increased volume of these types on offer, coupled with their decreased value, the average per bale return for the series was reduced by over \$100 pr bale.

Concern over an oversupply of fine skirtings due to harsh growing conditions, helped to push the broader skirtings higher (by-up-to 100 cents), with the higher VM types enjoying the largest gains, as buyers attempted to secure meaningful quantity of a limited selection.

The crossbreds had an overall positive sale, while the oddment sector was again the poorest performer (with the three carding indicators falling by an average of 6 cents).

Quantities increase next week, currently there are 37,664 bales rostered nationally.

Definitions:

* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown on the bottom line of table 2 & 3 (above) and in table 1 (on page 1), detail the amount of time during the past 3 & 10 years where the market has traded either at or below its current price.

* Deciles are a method of sorting ranked data into 10 equal groups. The data may be ranked from largest to smallest or vice versa.

The above Decile tables sort price Percentiles into 10 equal groups (in ascending order), with table 2 ranking the previous 3 years prices, while table 3 ranks prices over the previous 10 years.

Example: In Table 2, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1892 for 60% of the time, over the past three years.

In Table 3, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1412 for 60% of the time, over the past ten years.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 11: Returns pr head for skirted fleece wool.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 14: Returns pr head for skirted fleece wool.
