AU BALES OFFERED		47,914	* 16.5 is the lowest Micron Price Guide (MPG) published by The Australian Wool Exchange (AWEX). Therefore MPG's below 16.5 micron are an estimate based on the best available information at the time of publication. Likewise, for any category where there is insufficient quantity offered to enable AWEX to quote, a quote will also be provided. * Recording of 15 & 15.5 micron commenced in October 2017, and as a result some historic data is not yet available for those MPG's. Where historic data is not available an estimate based on '16 micron statistics' and incorporating the existing 15 & 15.5 micron data, will be provided as a guide.

## MARKET COMMENTARY Source: AWI & AWEX

Sales resumed this week after the annual three-week Christmas recess to a national offering of 50,509 bales; it was the third-largest sale for the season and the most bales in five months. Volumes were particularly high at the three-day Melbourne sale, which hosted its largest sale in 11 months, and Fremantle, which recorded its second-largest sale for the season.

The market commenced the calendar year following the lead of the first sale from the previous seven years, which all made gains. A hesitant start on Tuesday saw the market attract positive movements for best style & well-measured wools and discounts for good to average style and overlong wools, with prices gradually firming as buyer confidence increased. The positive momentum carried into Wednesday which saw solid increases, particularly for the stylish Melbourne offering. Thursday market closed the week with further gains in the medium microns.

By the close of trade, the EMI had gained 6 cents to close the week at 1333. The finer microns in the eastern states were generally 10-30 cents dearer, while the medium to broader microns eased by a similar amount. Merino Skirtings also found good support for most of the week, closing as much as 50 cents dearer. Crossbreds had heavy losses early before stabilising but still closed cheaper for the sale. Merino Cardings were generally in line with their pre-Christmas level.

Next week is expected to be a similar-sized catalogue with more than 51,000 bales forecast to be offered in three selling centres.

**Definitions:**

\* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown on the bottom line of table 2 & 3 (above) and in table 1 (on page 1), detail the amount of time during the past 3 & 10 years where the market has traded either at or below its current price.

\* Deciles are a method of sorting ranked data into 10 equal groups. The data may be ranked from largest to smallest or vice versa.

The above Decile tables sort price Percentiles into 10 equal groups (in ascending order), with table 2 ranking the previous 3 years prices, while table 3 ranks prices over the previous 10 years.

**Example:** In Table 2, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1654 for 60% of the time, over the past three years.

In Table 3, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1675 for 60% of the time, over the past ten years.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 9: Returns pr head for skirted fleece wool.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 10: Returns pr head for skirted fleece wool.
