AU BALES OFFERED	37,301		* 16.5 is the lowest Micron Price Guide (MPG) published by The Australian Wool Exchange (AWEX). Therefore MPG's below 16.5 micron are an estimate based on the best available information at the time of publication. Likewise, for any category where there is insufficient quantity offered to enable AWEX to quote, a quote will also be provided.																	
AU BALES SOLD	35,417		* Recording of 15 & 15.5 micron commenced in October 2017, and as a result some historic data is not yet available for those MPG's. Where historic data is not available an estimate based on '16 micron statistics' and incorporating the existing 15 & 15.5 micron data, will be provided as a guide.

MARKET COMMENTARY Source: AWEX

The wool market rose again this week, recording overall gains across both selling days. There were a total of 37,301 bales available to the trade, of which 35,301 were sold, representing a clearance rate of 94.9%, once again demonstrating sellers' willingness to accept the prices on offer.

On the opening day, the Merino fleece MPG's ranged from minus 4 to plus 32. Skirtings were irregular, and crossbreds recorded modest falls. The (EMI) finished the day 12 cents higher.

The second day recorded very little change across all three centres; the EMI rose by 4 cents to close at 1,693 (its highest level since August 2019). The EMI has been trending higher since the beginning of November. There have been 22 selling days since the 4th of November, and the EMI has risen on 19 of those days. The EMI has added 276 cents across these sales, an increase of 19.5%. When viewed in USD terms, the percentage gain is even more substantial. Since the beginning of November, the EMI has risen by 272 US cents, with a decrease on only three of those days, representing a gain of 29.7%.

Some large gains in the oddment market, particularly in the West on day one, have helped push the Merino Carding Indicators (MC) higher, continuing the upward trend. Across the three regions, the MCs climbed by an average of 28 cents.

Next week, the wool market heads into a recess for Chinese New Year. Sales will resume in the week beginning Monday, the 23rd of February.

Definitions:

* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown on the bottom line of table 2 & 3 (above) and in table 1 (on page 1), detail the amount of time during the past 3 & 10 years where the market has traded either at or below its current price.

* Deciles are a method of sorting ranked data into 10 equal groups. The data may be ranked from largest to smallest or vice versa.

The above Decile tables sort price Percentiles into 10 equal groups (in ascending order), with table 2 ranking the previous 3 years prices, while table 3 ranks prices over the previous 10 years

Example: In Table 2, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1503 for 60% of the time, over the past three years.

In Table 3, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1714 for 60% of the time, over the past ten years.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 9: Returns pr head for skirted fleece wool.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.
