| AU BALES OFFERED | 45,476 | | * 16.5 is the lowest Micron Price Guide (MPG) published by The Australian Wool Exchange (AWEX). Therefore MPG's below 16.5 micron are an estimate based on the best available information at the time of publication. Likewise, for any category where there is insufficient quantity offered to enable AWEX to quote, a quote will also be provided. | | | | | | | | | | | | | | | | | |
| AU BALES SOLD | 42,216 | | * Recording of 15 & 15.5 micron commenced in October 2017, and as a result some historic data is not yet available for those MPG's. Where historic data is not available an estimate based on '16 micron statistics' and incorporating the existing 15 & 15.5 micron data, will be provided as a guide. | | | | | | | | | | | | | | | | | |

MARKET COMMENTARY Source: AWEX

The market recorded an overall rise this week, with weakness shown toward the end of the series. The large price rises on offer during the previous week encouraged more sellers to enter the market, bolstering the national offering to 45,476 bales.

On the opening selling day (Tuesday), only Sydney and Fremantle were in operation, as Melbourne shifted to a Wednesday/Thursday selling pattern to accommodate a Monday Public Holiday. Despite many industry observers predicting a weaker market, the Sydney fleece market opened extremely strongly, and by the end of the day, the Northern region MPGs had risen 49-78 cents. In contrast, the Fremantle market was more subdued, with its MPGs finishing the day 10-26 cents higher.

On the second day (Wednesday) all three centres were in operation. The Melbourne market played catch-up, recording increases of 1-30 cents for all their merino MPGs. Sydney and Fremantle were unable to maintain the upward trajectory, recording falls across all their MPGs of 3-35 cents.

On the final day (Thursday), it was Melbourne selling in isolation. Generally, small losses were recorded, resulting in the EMI shedding 2 cents for the day.

Next week's offering is slightly smaller, with 42,953 bales currently expected to be on offer in Sydney, Melbourne and Fremantle.

Definitions:

- * A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.
Three and ten year percentiles shown on the bottom line of table 2 & 3 (above) and in table 1 (on page 1), detail the amount of time during the past 3 & 10 years where the market has traded either at or below its current price.
 - * Deciles are a method of sorting ranked data into 10 equal groups. The data may be ranked from largest to smallest or vice versa.
The above Decile tables sort price Percentiles into 10 equal groups (in ascending order), with table 2 ranking the previous 3 years prices, while table 3 ranks prices over the previous 10 years
- Example:** In Table 2, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1501 for 60% of the time, over the past three years.
In Table 3, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1720 for 60% of the time, over the past ten years.

Table 4: Riemann Forwards, as at: **11/03/26** Any highlighted in yellow are recent trades, trading since: **Thursday, 5 March 2026**

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 11: Returns pr head for skirted fleece wool.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 14: Returns pr head for skirted fleece wool.
