AU BALES OFFERED		49,181	* 16.5 is the lowest Micron Price Guide (MPG) published by The Australian Wool Exchange (AWEX). Therefore MPG's below 16.5 micron are an estimate based on the best available information at the time of publication. Likewise, for any category where there is insufficient quantity offered to enable AWEX to quote, a quote will also be provided.																		
AU BALES SOLD		32,839	* Recording of 15 & 15.5 micron commenced in October 2017, and as a result some historic data is not yet available for those MPG's. Where historic data is not available an estimate based on '16 micron statistics' and incorporating the existing 15 & 15.5 micron data, will be provided as a guide.																		
AU PASSED-IN%		33.2%

## MARKET COMMENTARY Source: AWEX

The market has suffered large losses in its return from the annual three-week mid-year recess. Wool accumulated over the break pushing the scheduled offering to 53,656 bales; and as the market opened, it was immediately apparent that the prices on offer were well below those achieved during the previous series.

As prices levels fell, so too did buyer confidence, causing prices to continually deteriorate as the week progressed. By the end of the series the individual Micron Price Guides (MPGs) across the country had fallen by between 31 and 136 cents (Melbourne, being the only centre in operation on the final day, experienced the largest losses). The NRI lost 59 cents for the series, closing the week at 1,463, this equated to a 3.9% reduction. Due to a softening of the Australian dollar (the AUD lost nearly a full cent compared to the previous selling week) the fall when viewed in USD terms was even higher, the NRI dropped by 62 US cents (5.8%).

No sector was immune to the falling market. The skirtings followed a similar path to the fleece, general losses of between 50 and 150 cents were felt, with the finer microns most affected. In percentage terms, the drop in the crossbreds MPGs was again similar to the merinos.

Understandably, the sharp reduction in prices resulted in a higher than normal passed in rate; and nationally 33.2% of the offering failed to meet seller reserve. In response to the falling market, next week's offering reduces, to 41,284 bales.

**Definitions:**

\* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown on the bottom line of table 2 & 3 (above) and in table 1 (on page 1), detail the amount of time during the past 3 & 10 years where the market has traded either at or below its current price.

\* Deciles are a method of sorting ranked data into 10 equal groups. The data may be ranked from largest to smallest or vice versa.

The above Decile tables sort price Percentiles into 10 equal groups (in ascending order), with table 2 ranking the previous 3 years prices, while table 3 ranks prices over the previous 10 years.

**Example:** In Table 2, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1812 for 60% of the time, over the past three years.

In Table 3, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1543 for 60% of the time, over the past ten years.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 9: Returns pr head for skirted fleece wool.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 12: Returns pr head for skirted fleece wool.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.
