AU BALES OFFERED		27,893	* 16.5 is the lowest Micron Price Guide (MPG) published by The Australian Wool Exchange (AWEX). Therefore MPG's below 16.5 micron are an estimate based on the best available information at the time of publication. Likewise, for any category where there is insufficient quantity offered to enable AWEX to quote, a quote will also be provided.																				
AU BALES SOLD		26,358	* Recording of 15 & 15.5 micron commenced in October 2017, and as a result some historic data is not yet available for those MPG's. Where historic data is not available an estimate based on '16 micron statistics' and incorporating the existing 15 & 15.5 micron data, will be provided as a guide.

## MARKET COMMENTARY Source: AWEX

For the second week in a row, the market recorded an overall increase, with currency movements playing a large role. Merino fleece, MPGs across the country gained up to 34 cents for the week. Merino skirting tracked a similar path, with small increases generally recorded across all types and descriptions. It was predominantly these movements (in the Merino sectors) that pushed the EMI to 1,099, representing an increase of 8 cents in local currency terms, while it remained unchanged in US dollars terms.

Season to date there have been 267,613 bales offered at auction (74,897 bales, or 21.9% less than last season). In percentage terms, there has been a similar reduction in the overall value of wool sold, with 315 million dollars worth of wool sold at auction Y.T.D., which is 23.7% (98 million dollars) lower than the corresponding sale of last season.

Next week's offering is of a similar size. There are currently 32,121 bales on offer nationally.

**Definitions:**

\* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown on the bottom line of table 2 & 3 (above) and in table 1 (on page 1), detail the amount of time during the past 3 & 10 years where the market has traded either at or below its current price.

\* Deciles are a method of sorting ranked data into 10 equal groups. The data may be ranked from largest to smallest or vice versa.

The above Decile tables sort price Percentiles into 10 equal groups (in ascending order), with table 2 ranking the previous 3 years prices, while table 3 ranks prices over the previous 10 years

**Example:** In Table 2, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1656 for 60% of the time, over the past three years.

In Table 3, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1471 for 60% of the time, over the past ten years.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

**Table 9: Returns pr head for skirted fleece wool.**

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.
