Australian Dollar 0.658

The market strengthened again this week continuing from the positive sentiment from the last. Business done on Thursday night last week resulted in the forward markets rising to premiums 30c/kg clean above the spot. Auctions commenced on Wednesday, with rises of 20-25ac for 19-22micron, 5-10c/kg for 18.5 and finer and >23micron. The market consolidated on Thursday with prices again pushing up 10c/kg for most microns except fine crossbreds which were reported down 10-15c/kg. Skirtings were up to 30c/kg clean dearer, lower VM types most affected. Cardings were also dearer with crutchings up 15-20ckg and locks 5-10c/kg.

The positive market this week reflected the late interest last week from overseas. China's inquiry has increased however many of their prices offered lag 30c/kg behind current market levels. India was again active as were some of the Europeans.

Next week's auction will be in Newcastle, following this week's offering of 4000 bales of quality fine wools from Tassie in the South. Better style skirtings were keenly sourced from this offering, however, fleece wools continued to attract little attention.

With the lift in the market, prices for 20-24 micron are again in the top 10% of prices seen throughout the past 8 years. Good hedging opportunities exist at the moment, with prices available for autumn delivery at only a10-15c/kg clean discount to today's levels.
