AU BALES OFFERED		30,275	* 16.5 is the lowest Micron Price Guide (MPG) published by The Australian Wool Exchange (AWEX). Therefore MPG's below 16.5 micron are an estimate based on the best available information at the time of publication. Likewise, for any category where there is insufficient quantity offered to enable AWEX to quote, a quote will also be provided.																	
AU BALES SOLD		27,790	* Recording of 15 & 15.5 micron commenced in October 2017, and as a result some historic data is not yet available for those MPG's. Where historic data is not available an estimate based on '16 micron statistics' and incorporating the existing 15 & 15.5 micron data, will be provided as a guide.

MARKET COMMENTARY Source: AWEX

The Australian wool market experienced an unusual week, all merino fleece types and all crossbred fleece types recorded increases, however there were significant losses in the oddments and the skirting market was also unable to maintain the previous weeks level.

30,272 bales were put before the trade, 12,492 less than were offered in the previous week. The smaller fleece offering attracted strong widespread competition, which helped push prices higher. Across the country merino fleece MPGs rose by 2-29 cents, and with a passed-in rate of 8.2%, compared to the previous weeks 30.1%, it suggests that sellers were prepared to accept the current level.

Crossbreds also posted increases, with their MPGs gaining up to 23 cents, while the skirting market suffered small losses with all types and descriptions generally falling by 20-30 cents. However, dramatic losses in the carding sector saw locks, stains and crutchings generally fall a further 70-90 cents.

The losses in the skirting and carding market offset the gains made in the fleece market, as a result the NRI barely moved, closing the week 2 cents dearer at 1,046. Compared to the corresponding sale of the previous season, the NRI is now 658 cents lower (a drop of 39%).

Next week's national offering increases slightly, with 35,252 bales currently forecast for sale.

Definitions:

* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown on the bottom line of table 2 & 3 (above) and in table 1 (on page 1), detail the amount of time during the past 3 & 10 years where the market has traded either at or below its current price.

* Deciles are a method of sorting ranked data into 10 equal groups. The data may be ranked from largest to smallest or vice versa.

The above Decile tables sort price Percentiles into 10 equal groups (in ascending order), with table 2 ranking the previous 3 years prices, while table 3 ranks prices over the previous 10 years.

Example: In Table 2, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 2149 for 60% of the time, over the past three years.

In Table 3, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1572 for 60% of the time, over the past ten years.

JEMALONG WOOL BULLETIN

(week ending 12/08/2020)

The above '**Rise or Fall**' graph, shows how often the market has risen or fallen in a given month over the past 10 years, it does not show the extent of the movement only the frequency of direction. The '**Monthly Price Movement**' graph shows the extent of movement for each month, for the past 5 years.

The above graph, shows how often the '12 month high & low' have been achieved for a given month over the past 10 years. It is not a measure of probability.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 9: Returns pr head for skirted fleece wool.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 10: Returns pr head for skirted fleece wool.
