Note:

\* Due to the irregular market quoting for some fine wool categories, figures shown relating to micron categories below 18 micron are an estimate based on the AWEX Premium & Discounts Report & other available information.

\* For any category, where there is insufficient quantity offered to enable AWEX to quote, a quote will be provided based on the best available information.

\* 10 Year data is not available for some micron categories, which may result in blank spaces in the table above.

#### Definitions:

\* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown in the table above, detail the period of time during the past 3 & 10 years that the market has traded either at or below its current price. The higher the percentile, the stronger the market.

## MARKET COMMENTARY

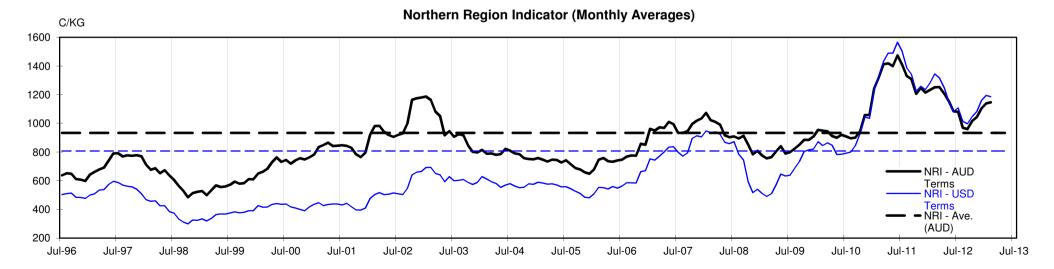

## **One Australian Dollar =** 1.035186 **US as of:** 14/02/2013

# NORTHERN REGION – Sale Week 33/12 (50,359 bales offered nationally)

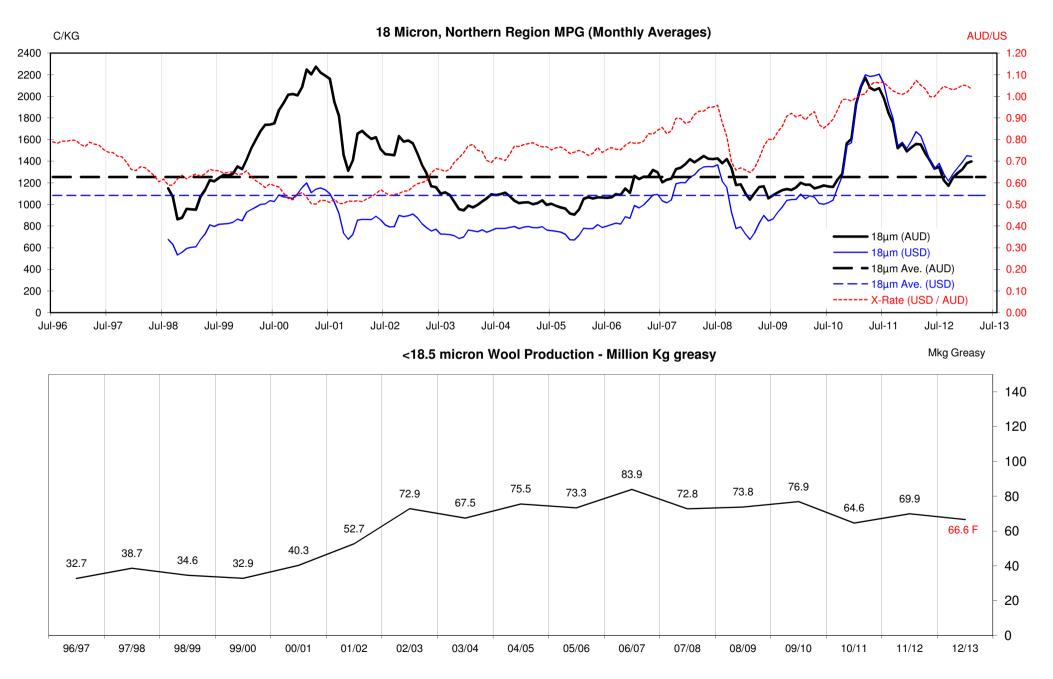

<u>Wednesdays</u> market closed 15-20 cents lower, with the better style and strength lots least affected, while the lower strength and high mid break lots were subjected to significant buyer discounting. Merino skirtings ended the day up to 10 cents cheaper at the finer end (<19 microns), while 19.5um and broader remained firm. Bellies retreated by 10-20 cents, crutchings and stains remained unchanged while locks rose by 10 cents. 26 to 27 micron crossbredds eased 5-10 cents while 28 micron and broader remained unchanged. 6.7% PI

<u>Thursdays</u> market regained most of Wednesdays losses for the medium to broader microns. 19 to 21 microns gained 10-15 cents with only minor movements for the finer micron categories where the better style and strength lots attracted good support. Merino skirtings, 18 micron and broader gained 10 cents with the 5-8% VM types most affected. Locks again finished insellers favour with the finer microns 20 cens dearer. Crutchings also gained up to 10 cents while stains remaind unchanged. 27 to 30 micron crossbreds also ended the day slightly dearer, gaining upto 5 cents. 4.8 % PI.

Market outlook - What direction the market takes from now is a little unclear, with mixed sentiment amongst the trade. Some in the exporting/buying fraternity remain upbeat and optermistic (and the forward market in recent weeks would support this view), however others feel the market is near the top (if it has not already peaked) and although there is a chance of another spike this month, they are more inclined to feel the market will platto and maybe begin to fall. It is also reported that some of the larger forward commitment for February shipment, are now complete, which could result in forward sellers taking the opportunity to reduce their buying, leaving the market direction to be determined by indent orders.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.
