Note:

\* Due to the irregular market quoting for some fine wool categories, figures shown relating to micron categories below 18 micron are an estimate based on the AWEX Premium & Discounts Report & other available information.

\* For any category, where there is insufficient quantity offered to enable AWEX to quote, a quote will be provided based on the best available information.

\* 10 Year data is not available for some micron categories, which may result in blank spaces in the table above.

Definitions:

\* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown in the table above, detail the period of time during the past 3 & 10 years that the market has traded either at or below its current price.

The higher the percentile, the stronger the market.

## MARKET COMMENTARY

One Australian Dollar = 0.996097 cents US as of: 14/06/2012

### NORTHERN REGION –Sale Week 50/11 (33,868 bales offered nationally)

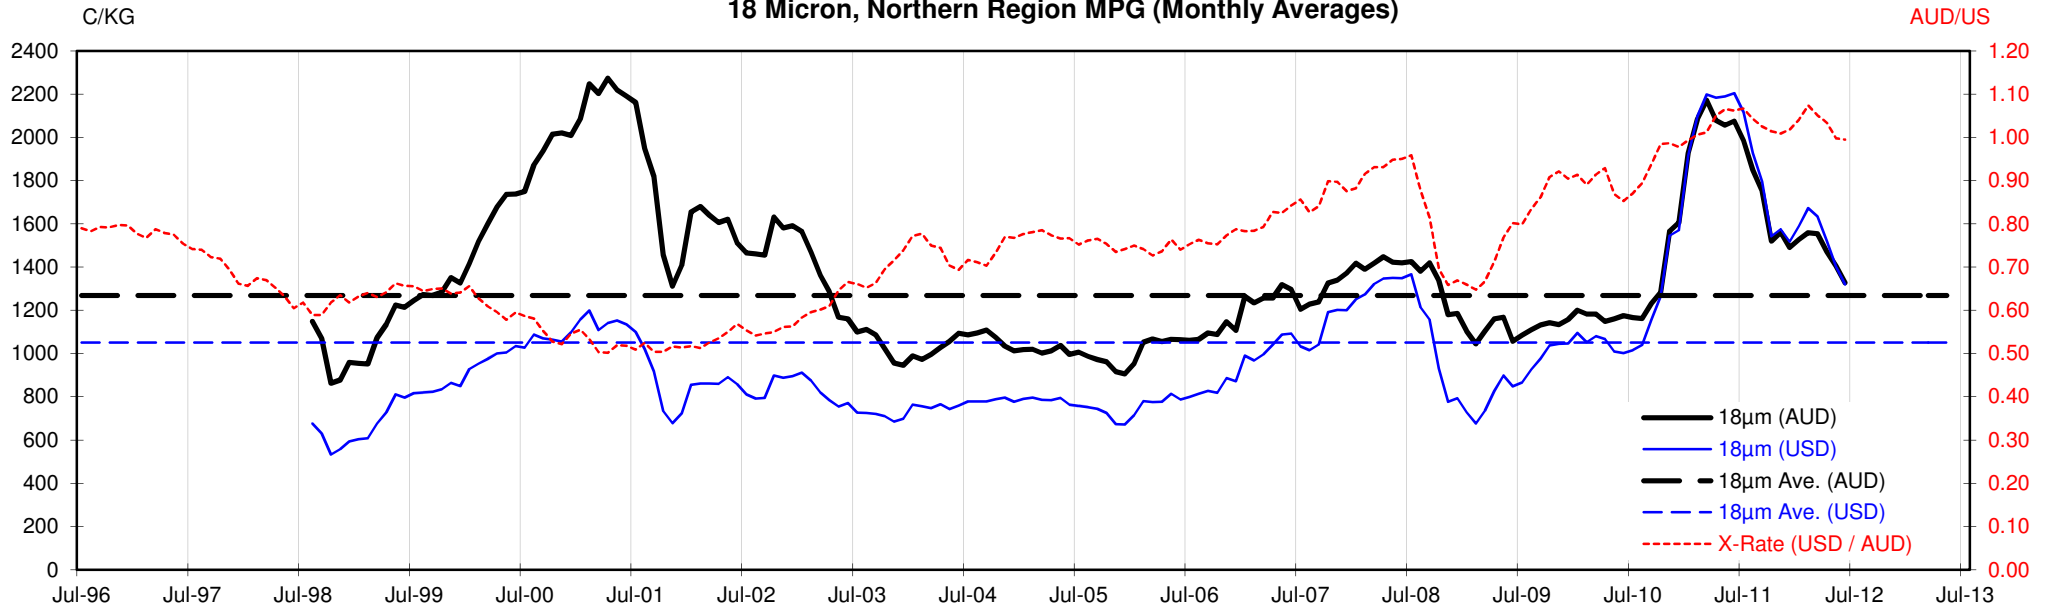

Wednesdays market saw low Vm types start off reasonably well, however buyer support dissipated as the sale progressed, leaving most microns 10 to 20 cents lower. Merino skirtings were in line with burry fleece closing 20 to 30 cents lower. Locks fell 40 cents with buyers paying strict attention to colour, crutchings were reduced by 20 and stains by 10. Crossbreds were less affected with 28 to 30 microns 3-5 cents easier on a nominal basis. 14.5% PI

Thursdays market saw prices concede a further 15 to 20 cents despite improved interest by the end of the sale (on some of the better style lots). A limited number of fine microns resulted in the 17 micron area being reduced by 30-40 cents, while a late rally on better style and length skirtings helped level out the skirting market, with most microns closing around 10 cents easier. Locks also found some extra support and increased by 5 cents while crutchings closed in buyers favour and stains remained unchanged. The crossbred market remained generally unchanged on a limit offering for 27 to 30 microns. 13.2% PI

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.
