* Note: Due to the irregular market quoting for super fine wool, figures shown relating to micron categories below 18 mic, are an estimate based on the 42 nkt AWEX Premium & Discount Report & other available information. 10 year data is not available on some micron categories, which may result in blank spaces in the table above.

MARKET COMMENTARY

Australian Dollar

78.84 US as of 15/03/2007

NORTHERN REGION – Sydney Sale S37/06

On Wednesday – The market gained 20-30 cents over, all on the back of a small offering. After an initial jump of 30-40 cents the Merino Fleece levelled out to close around 30 cents higher for 17-23 microns. Although some finer microns with good style and strength extracted premiums the lower Nkt and higher Vm types were not left out, increasing by 20-30 cents. Boosted by strong competition, merino skirtings rose 20 cents for most microns with 4-8% Vm (some finer types 17-18 microns made even further gains). Locks closed up to 5 cents dearer while crutchings were 10-20 cents higher with the 20 micron types most affected. Merino stains were very strong gaining at least 20 cents. Crossbreds remained generally unchanged for 27-30 microns. 6.9% Passed In.

On Thursday – Broader merino fleece eased as the market levelled out. 20.5 microns and coarser retreated 5-10 cents after yesterdays jump (with the coarser microns taking the brunt of the fall). 20 micron and finer generally retained their previous levels as buyers competed for the better style and strength types but were hesitant on the lower yield and Nkt wools. Merino skirtings once again attracted strong competition and rose 10 cents for 4-8% vm types with the 19 microns and finer most affected. Locks finished the day 20 cents dearer. Crutchings remained firm with stains gaining 10 cents. Crossbreds once again tracked sideways with 28-30 microns unchanged.

Next weeks offering consists of 56,943 bales (an increase of 1.1% on the previous estimate of 56,310 bales).

A Decile rank is a rating, usually of performance, on a scale of 1 to 10 where 1 is best, 10 is worst, and each number corresponds to an increment of 10 percentage points.

A percentile is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general, a percentile less than 25 is considered below normal, a percentile between 25 and 75 is considered normal, a percentile greater than 75 is considered above normal.

Table 6 shows estimated returns per head on fleece wool, based on a skirted fleece weight of 9kg. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 7: Returns for fleece wool pr head, based on skirted weight of: 8 kg

Table 8 shows estimated returns per head on fleece wool, based on a skirted fleece weight of 7kg. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 9: Returns for fleece wool pr head, based on skirted weight of: 6 kg

Table 10 shows estimated returns per head on fleece wool, based on a skirted fleece weight of 5kg. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 11: Returns for fleece wool pr head, based on skirted weight of: **4 kg**

Table 12 shows estimated returns per head on fleece wool, based on a skirted fleece weight of 3kg. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 13: Returns for fleece wool pr head, based on skirted weight of: 2 kg
