Note:

* Due to the irregular market quoting for some fine wool categories, figures shown relating to micron categories below 18 micron are an estimate based on the AWEX Premium & Discounts Report & other available information.

* For any category, where there is insufficient quantity offered to enable AWEX to quote, a quote will be provided based on the best available information.

* 10 Year data is not available for some micron categories, which may result in blank spaces in the table above.

Definitions:

* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown in the table above, detail the period of time during the past 3 & 10 years that the market has traded either at or below its current price.

The higher the percentile, the stronger the market.

MARKET COMMENTARY

One Australian Dollar = \$ 1.05 US, as of 15/03/2012

NORTHERN REGION –Sale Week 37/11 (43,414 bales offered nationally)

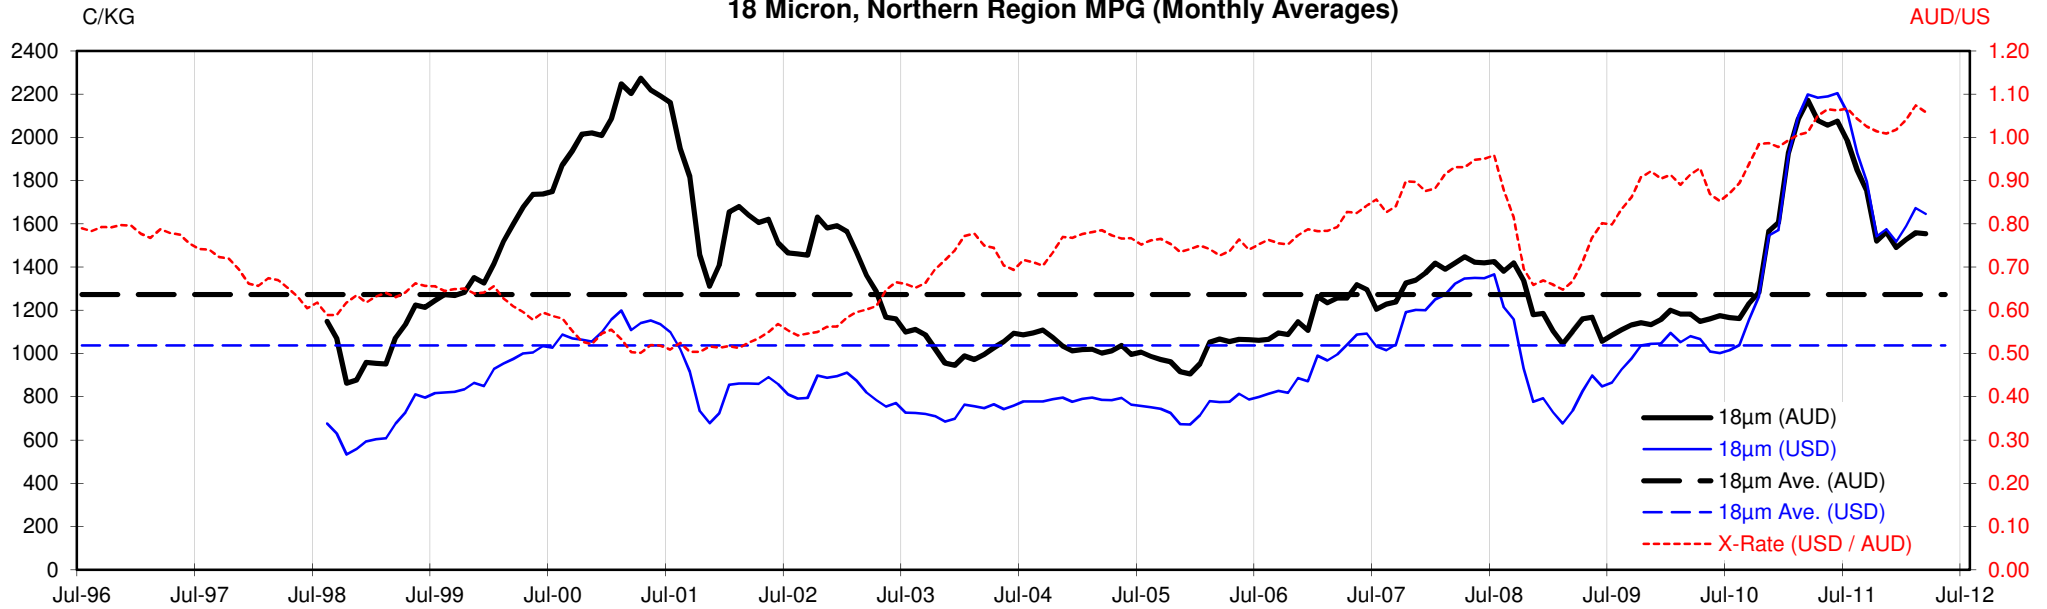

Wednesdays market lifted 30 cents after a strong start. 18 to 21.5 microns all increased by 25 to 30 cents with momentum improving throughout the sale. A smaller lower style & strength offering of finer wools did not attract the same attention however still managed a 10 to 15 cent rise. 18 to 20 micron skirtings attracted wide spread support, with 3% to 8% types increasing by 20 cents while some of the higher Vm lots gained 30 cents. Locks did not follow the same upward trend, falling 10 to 15 cents with 18 and 19 microns most affected. Crutchings on the other hand gained 10 cents, while stains remained unchanged. The crossbred market improved 5 to 10 cents for 28 to 30 microns. 5.3% PI

Thursdays market was solid, good support from all sectors lifted 18 to 22 microns 5-10 cents. While small in volume, a better style offering at the finer end lifted 17 & 17.5 microns 25-30 cents. Merino skirtings were also well supported with the 3% Vm and less types very firm to sellers favour, where as the higher Vm lots (5-8%) rose 10-20 cents (for 19 micron and broader). Locks continued to slip, losing a further 10 to 15 cents, where as crutchings & stains remained fully firm. On a small offering 28 to 30 micron crossbreds closed 5-10 cents dearer. 4.9% PI

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.
