AU BALES OFFERED		46,256	* 16.5 is the lowest Micron Price Guide (MPG) published by The Australian Wool Exchange (AWEX). Therefore MPG's below 16.5 micron are an estimate based on the best available information at the time of publication. Likewise, for any category where there is insufficient quantity offered to enable AWEX to quote, a quote will also be provided. * Recording of 15 & 15.5 micron commenced in October 2017, and as a result some historic data is not yet available for those MPG's. Where historic data is not available an estimate based on '16 micron statistics' and incorporating the existing 15 & 15.5 micron data, will be provided as a guide.

MARKET COMMENTARY Source: AWEX

There were originally 49,990 bales gazetted for sale this week, however with a softening in price, for some sectors of the market, 7.5% of the offering was withdrawn prior to sale.

The strongest demand was in the finer micron categories, which helped push prices higher across the country for 18 micron and finer, which saw 16.5 to 18 MPG's rise by 5-80 cents across the country, however the 19 to 22 MPG's fell by 20-57 cents. The mixed result resulted in minimal movement in the NRI, which lost 14 cents, closing at 1,355.

Melbourne sold in isolation on the final day (Thursday), and on a positive note, recorded increases of 15-53 cents for 16.5 to 20 microns. Of note, the 17-micron MPG (in the south) rose to 2,172, its highest level in nearly two years.

The rise in the finer microns, coupled with the fall at the broader end, has increased the price differential between microns. This is best highlighted comparing the difference between the Southern 17 and 21 MPG, which has grown to 927 cents, compared to a difference of 756 cents a month ago.

Next week's offering is similar, there are currently 45,544 bales available.

Definitions:

* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown on the bottom line of table 2 & 3 (above) and in table 1 (on page 1), detail the amount of time during the past 3 & 10 years where the market has traded either at or below its current price.

* Deciles are a method of sorting ranked data into 10 equal groups. The data may be ranked from largest to smallest or vice versa.

The above Decile tables sort price Percentiles into 10 equal groups (in ascending order), with table 2 ranking the previous 3 years prices, while table 3 ranks prices over the previous 10 years.

Example: In Table 2, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 2092 for 60% of the time, over the past three years.

In Table 3, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1534 for 60% of the time, over the past ten years.

JEMALONG WOOL BULLETIN

(week ending 15/04/2021)

JEMALONG WOOL BULLETIN

(week ending 15/04/2021)

Page 11/26

The above 'Rise or Fall' graph, shows how often the market has risen or fallen in a given month over the past 10 years, it does not show the extent of the movement only the frequency of direction. The 'Monthly Price Movement' graph shows the extent of movement for each month, for the past 5 years.

The above graph, shows how often the '12 month high & low' have been achieved for a given month over the past 10 years. It is not a measure of probability.

JEMALONG WOOL BULLETIN

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 9: Returns pr head for skirted fleece wool.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.
