AU BALES OFFERED		39,762	* 16.5 is the lowest Micron Price Guide (MPG) published by The Australian Wool Exchange (AWEX). Therefore MPG's below 16.5 micron are an estimate based on the best available information at the time of publication. Likewise, for any category where there is insufficient quantity offered to enable AWEX to quote, a quote will also be provided.																	
AU BALES SOLD		30,544	* Recording of 15 & 15.5 micron commenced in October 2017, and as a result some historic data is not yet available for those MPG's. Where historic data is not available an estimate based on '16 micron statistics' and incorporating the existing 15 & 15.5 micron data, will be provided as a guide.

MARKET COMMENTARY Source: AWI

A tough market saw prices retreat for the sixth consecutive week. The national offering climbed to 39,766 bales, with all three centres selling.

After this week, only two more sales remain in the current season, and the total amount offered continues to be just above that of the previous season. There have been 1,804,810 bales offered so far this season, 16,000 more than the previous.

The largest losses were felt on the first day. From the opening lot, it was apparent that buyer sentiment was weak, and the offer prices were well below those of the previous series. Prices opened lower and continually reduced as the day progressed. By the end of the first day, the MPGs for Merino fleece had fallen by 19-90 cents. In the East, the skirting markets generally fell 15-30 cents, while the other sectors recorded minimal change. As a result, the EMI dropped 21 cents.

Day two recorded further losses as the market could not find a firm level. The Merino fleece MPGs dropped a further 3-64 cents, except for a few scattered MPGs, which remained unchanged. The EMI lost another 13 cents for the day, with minimal movements in the other sectors preventing a larger fall.

The EMI dropped 34 cents for the series, closing at 1,174 cents, and is now 293 cents (20%) lower than at the same time last year.

Fremantle heads into another non-sale week, reducing next week's national quantity. Currently, there are expected to be 33,463 bales on offer, with only Sydney and Melbourne in operation.

Definitions:

* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown on the bottom line of table 2 & 3 (above) and in table 1 (on page 1), detail the amount of time during the past 3 & 10 years where the market has traded either at or below its current price.

* Deciles are a method of sorting ranked data into 10 equal groups. The data may be ranked from largest to smallest or vice versa.

The above Decile tables sort price Percentiles into 10 equal groups (in ascending order), with table 2 ranking the previous 3 years prices, while table 3 ranks prices over the previous 10 years.

Example: In Table 2, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1658 for 60% of the time, over the past three years.

In Table 3, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1456 for 60% of the time, over the past ten years.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 9: Returns pr head for skirted fleece wool.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 10: Returns pr head for skirted fleece wool.
