AU BALES OFFERED		35,413	* 16.5 is the lowest Micron Price Guide (MPG) published by The Australian Wool Exchange (AWEX). Therefore MPG's below 16.5 micron are an estimate based on the best available information at the time of publication. Likewise, for any category where there is insufficient quantity offered to enable AWEX to quote, a quote will also be provided. * Recording of 15 & 15.5 micron commenced in October 2017, and as a result some historic data is not yet available for those MPG's. Where historic data is not available an estimate based on '16 micron statistics' and incorporating the existing 15 & 15.5 micron data, will be provided as a guide.

MARKET COMMENTARY Source: AWEX

The wool market trended lower this week, recording an overall reduction for the third consecutive selling series. Main buyer interest continued to be in the medium and broad micron ranges; the solid widespread competition on those types meant that the prices offered throughout the series were similar to those achieved in the previous week. As a result, movements in the individual Micron Price Guides (MPGs) for 19-22 microns ranged between +11 and -14 cents. However, the finer end of the merino spectrum did not receive the same level of support, and the competition on these lots was noticeably lower, deteriorating further as the week progressed. The hardest hit was 17.5 microns and finer; the MPGs in this range dropped by 69-135 cents.

The finer microns have now suffered sustained losses over three weeks. The largest falls have occurred in the Southern MPGs for 16.5-17.5 microns, which have fallen by 272-306 c/kg (10.3%-11.5%). The AWEX-EMI fell another 13 cents over the two selling days, its third week of falls and the ninth consecutive week where the EMI has failed to register an increase. It has been the longest run without a week-on-week rise in the AWEX-EMI in almost 19 years. The benchmark indicator is quickly approaching 1300 cents (the EMI currently sits at 1,306 cents) and is now at its lowest level in 16 months.

The crossbred sector performed with mixed results. The 26 and 30 micron MPGs recorded an overall rise, while the 28 MPGs dropped in both centres, falling to 363 in the North and 373 in the South, their lowest levels in 22 years.

Definitions:

* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown on the bottom line of table 2 & 3 (above) and in table 1 (on page 1), detail the amount of time during the past 3 & 10 years where the market has traded either at or below its current price.

* Deciles are a method of sorting ranked data into 10 equal groups. The data may be ranked from largest to smallest or vice versa.

The above Decile tables sort price Percentiles into 10 equal groups (in ascending order), with table 2 ranking the previous 3 years prices, while table 3 ranks prices over the previous 10 years.

Example: In Table 2, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1680 for 60% of the time, over the past three years.

In Table 3, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1673 for 60% of the time, over the past ten years.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 9: Returns pr head for skirted fleece wool.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 10: Returns pr head for skirted fleece wool.
