AU BALES OFFERED		33,265	* 16.5 is the lowest Micron Price Guide (MPG) published by The Australian Wool Exchange (AWEX). Therefore MPG's below 16.5 micron are an estimate based on the best available information at the time of publication. Likewise, for any category where there is insufficient quantity offered to enable AWEX to quote, a quote will also be provided.																				
AU BALES SOLD		30,137	* Recording of 15 & 15.5 micron commenced in October 2017, and as a result some historic data is not yet available for those MPG's. Where historic data is not available an estimate based on '16 micron statistics' and incorporating the existing 15 & 15.5 micron data, will be provided as a guide.

MARKET COMMENTARY Source: AWEX

The market recorded an overall loss this week. 33,265 bales were on offer, 7,030 more than the previous series. Season to date, the total amount of bales offered continues to track below the previous season. A total of 369,025 bales have been offered, 48,774 fewer than the previous season, a drop of 11.7%.

On the opening day, the market generally retracted, although good-style wools with favourable additional measurement results were well supported and showed little change. The finer microns were also well supported, with gains recorded, particularly in the North and the West. MPG movements across the country ranged from plus 14 to minus 32 cents. The EMI closed at 1,813, down 7 cents, and with minimal currency movement, it closed 6 cents lower in US dollar terms.

On the second day with just Sydney and Melbourne in operation, the market continued to fall. Again, good style, good additional measurement wool attracted strong demand and sold at levels similar to the previous day. Lesser style types and those with poor additional measurements did not receive the same support and drove the overall softer market. MPGs dropped by 3 to 32 cents; only the 17.5 micron MPG in the North posted a positive result, and the EMI lost a further 10 cents as a result.

Despite recent losses and less wool sold Y.T.D., the total dollar amount of wool sold is well above the corresponding sale of the previous season. Season to date, the auction system has sold \$ 609 million worth of wool; that is \$ 107 million more than the previous season.

Next week's offering is expected to fall, with only 26,883 bales currently forecast.

Definitions:

* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown on the bottom line of table 2 & 3 (above) and in table 1 (on page 1), detail the amount of time during the past 3 & 10 years where the market has traded either at or below its current price.

* Deciles are a method of sorting ranked data into 10 equal groups. The data may be ranked from largest to smallest or vice versa.

The above Decile tables sort price Percentiles into 10 equal groups (in ascending order), with table 2 ranking the previous 3 years prices, while table 3 ranks prices over the previous 10 years

Example: In Table 2, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1559 for 60% of the time, over the past three years.

In Table 3, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1768 for 60% of the time, over the past ten years.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 9: Returns pr head for skirted fleece wool.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 10: Returns pr head for skirted fleece wool.
